Product Description

1 Liter Vegetable Oil Tin Can Z4
The 1 Liter Vegetable Oil Tin Can is a seamed metal oil tin with a compact body and a single practical opening, designed for small-volume filling. With a 67 × 93 mm base and 60 mm height, it suits fill volumes ranging from 0.3 to 1.3 liters. This product belongs to the Vegetable Oil Tin Can series under Kontensan's Food Tin & Metal Packaging main category.
Who Is the 1 Liter Vegetable Oil Tin Can Suitable For?
This small-volume oil tin suits premium and boutique oils, single-unit consumer packaging and gift presentations. Its compact body and single Ø24 practical opening give simple, controlled pouring for low-volume products. Kontensan 1 Liter Vegetable Oil Tin Can Z4 can be produced for liquid oils such as sunflower, corn, and olive oil; the food-grade internal coating keeps the oil fresh.
Coating and Printing Options
This oil tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. A single Ø24 practical cap provides a fixed, controlled pouring opening. With metal offset printing, a custom brand design is applied to the compact surface.
Durability and Food Safety
Seam coating options and food-grade lacquer systems support leak resistance and hygiene throughout the shelf life.
Kontensan Production Assurance
Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies oil tins from Türkiye to more than 30 countries. Alternative moulds, such as another 1-liter oil tin, can also be produced to fit your needs.
Frequently Asked Questions - FAQ
How many kilograms of oil does a 1 liter oil tin hold?
Liquid oils have a density of about 0.91 kg per liter, so 1 liter of oil weighs roughly 0.9 kg. The tin suits a 0.3–1.3 liter fill range, so the weight varies with the fill amount.
What is the opening design of the 1 liter vegetable oil tin can?
It is produced with a single Ø24 practical cap. This fixed small opening gives simple, controlled pouring for low-volume products.
What is the lowest fill volume?
The fill range goes down to 0.3 liters, which also makes it suitable for very small premium and sample presentations.
Is it suitable for olive oil?
Yes. Thanks to its food-grade internal coating options, it is suitable for olive oil and other liquid vegetable oils.
