Product Description

1 L Welded Side-Seam Tea and Coffee Tin

The 1 L Welded Side-Seam Tea and Coffee Tin is a metal coffee tin that stands out with its Welded Side-Seam body and easy-open aluminum lid option. With a Ø99 mm diameter and 38 mm height, it suits fill volumes ranging from 0.3 to 2.2 liters. This product

belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Welded Side-Seam Body and Easy-Open Lid

The Welded Side-Seam tea tin offers a strong body with its Welded Side-Seam. The easy-open aluminum lid provides a ring-pull, can-type closure, so the content can be sealed airtight. Slip-on and open-mouth options are also available. This structure is especially suitable for keeping coffee fresh for a long time.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the easy-open aluminum lid minimizes air contact. In this way, a metal coffee tin strongly preserves aroma and freshness.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the outer surface.

Durability and Food Safety

The Welded Side Seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Alternative moulds, such as a 180 mm easy-open and a 500 ml slip-on version, can also be produced.

Frequently Asked Questions - FAQ

What is a Welded Side Seam tin?

A Welded Side-Seam tin has its body joined with a welded side-seam. This structure gives a strong body and is suitable for use with can-type lids.

What does the easy-open (aluminum) lid provide?

The easy-open aluminum lid is a ring-pull can lid. It lets the content be sealed airtight and opened easily.

Can this tin be sealed airtight?

Yes. When produced with the easy-open aluminum lid, the content can be sealed airtight; this protects the freshness of sensitive products such as coffee.

How much product fits in a 0.3–2.2 liter tin?

Capacity depends on the product's density. This range suits single-serve and medium-volume tea and coffee presentations.
