Product Description

10 Liter Margarine Tin

The 10 Liter margarine tin can CA is an industrial metal food package designed for margarine, bakery margarine, and similar fat-based products during filling, storage, and transport. The CA technical sheet lists a 198 mm diameter, 198 mm length, 170 mm height, and an applicable capacity range of 6–12 liters. This allows the same mold to support more than one filling volume instead of only the nominal 10 L size. The welded body, metal handle, different opening diameters, and closure options make the package adaptable to different production needs. Manufactured by Kontensan, this margarine tin box is suitable for industrial food packaging, bakery margarine packaging, metal oil tin applications, and other professional-use projects. The phrase tin can is used here only as a common English description; the source product name remains Margarine Tin.

Key Features of the 10 Liter Margarine Tin

198 × 198 mm Size and 6–12 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Margarine Tin Cans subcategory. The 198 × 198 mm body size and 170 mm height provide a practical format for professional kitchens, bakery production, and industrial filling. The 6–12 L applicable capacity range supports flexible filling plans within the same mold family.

Closure, Opening and Metal Handle Options

The technical sheet lists Ø90 mm and Ø129 mm opening options. Closure choices include Ø90 metal plug, Ø90 lacquered metal plug, and Ø129 Bonbon. The handle is listed as metal. Handle or cap colors can be yellow, blue, green, white, red, black, orange, or none.

Welded Body and Coating Options

The body is welded. Seam coating options include lacquered inside and outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Inner and outer surfaces can also use silver lacquer, gold lacquer, enamel, clear lacquer, and offset printing options. The source lists no form or bead.

Frequently Asked Questions - FAQ

What is the technical capacity range of the 10 liter margarine tin?

The CA technical sheet lists an applicable capacity range of 6–12 liters.

Which closure options are available?

The source lists Ø90 metal plug, Ø90 lacquered metal plug, and Ø129 Bonbon options.

Does this tin can have a metal handle?

Yes. The technical sheet lists the handle as metal.

Can this package be used for 10 kg margarine?

The source does not provide a direct kilogram-based suitability statement. The product has a 6–12 L technical capacity range, and kilogram conversion depends on margarine density.
