Product Description

10 Liter Vegetable Oil Tin Can

The 10 Liter Vegetable Oil Tin Can is a seamed metal oil tin designed for mid-volume filling. With a 215 mm diameter and 200 mm height, it suits fill volumes ranging from 9 to 13 liters. This product belongs to the Vegetable Oil Tin Can series under Kontensan's Food Tin & Metal Packaging main category.

Which Oils Is the 10 Liter Vegetable Oil Tin Can Suitable For?

It is suitable for packing liquid oils such as sunflower, corn, cottonseed, canola and olive oil. Its seamed body and food-grade internal coating limit the oil's contact with light and oxygen, protecting its freshness and shelf life. With its mid-size profile, this oil tin is a practical choice for both retail and mid-scale filling lines.

Technical Specifications and Dimensions

The table below shows the core technical values and configurable options of the 10 liter vegetable oil tin can. Sheet thickness can be selected as 0.28 or 0.30 mm as needed.

Coating, Cap and Printing Options

This vegetable oil tin can can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Ø32 and Ø42 mm holes with practical, vented or threaded cap options let you configure it for your filling line. With metal offset printing, a custom brand design is applied to the outer surface.

Durability and Food Safety

Seam coating options and food-grade lacquer systems support leak resistance and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies oil tins from Türkiye to more than 30 countries. Alternative sizes, such as an 11 liter oil tin, can also be produced to fit your needs. This 10 liter vegetable oil tin can supports brands' shelf value with its durable structure and print quality.

Frequently Asked Questions - FAQ

How many kilograms of oil does a 10 liter oil tin hold?

Liquid oils have a density of about 0.91 kg per liter, so 10 liters of oil weighs roughly 9 kg. The tin suits a 9–13 liter fill range, so the weight varies with the fill amount.

Is this tin suitable for olive oil?

Yes. Thanks to its food-grade internal coating options, it is suitable for olive oil and other liquid vegetable oils.

How long is oil protected in a tin?

Metal packaging blocks light and air, which extends the oil's shelf life. The exact time depends on the oil type, production date and storage conditions.

Can a custom brand print be applied to the package?

Yes. A custom brand design can be applied to the outer surface with our metal offset printing lines.
