Product Description

11 Liter Olive Oil Tin Can BA

11 Liter Olive Oil Tin Can BA is a metal packaging option for companies selling olive oil in medium and larger packs. Kontensan offers the product within Olive Oil Tin Cans under Food Tin & Metal Packaging. Choosing olive oil tin packaging involves more than its volume. Producers should also check filling equipment, carrying handles, closure systems and the suitability of surfaces in contact with the oil. Buyers ordering empty olive oil tins wholesale need to confirm the exact product configuration.

Technical Features of the 11 Liter Olive Oil Tin

The BA mold family has body dimensions of 215 × 215 mm, a reference height of 200 mm and a capacity range of 9 to 13 liters. However, the finished L444 11-liter model is 245 mm high. The L444 version uses 0.30 mm sheet metal, a 32 mm opening, a matching practical closure, a green plastic handle and a seamed body. In the L444 datasheet row, internal coating, external coating, seam coating and shaped reinforcement are all listed as absent. Other lacquer or shaping options available in the BA family must not be described as standard on this product.

Choosing Closures and Inner Surfaces for Olive Oil Tins

Metal olive oil packaging can reduce direct exposure to light. However, a secure closure, suitable temperatures and proper storage remain important for maintaining oil quality. The BA family lists 32 and 42 mm openings, practical caps, vented options and several lacquer finishes. These are possible mold-family configurations, not confirmed standard features of L444. As its product row does not specify an inner coating, food-contact suitability for olive oil must be confirmed before ordering.

Wholesale Olive Oil Tins, Printing and Prices

When sourcing wholesale olive oil tins, buyers should include metal thickness, closure, handle, coating, printing and order quantity in their quotations. Brands seeking custom printed olive oil tins can consider Kontensan's metal offset printing facilities for suitable configurations. Printing, however, is not a confirmed standard feature of L444. Empty olive oil tin prices are meaningful only when buyers compare the same product code and specifications. Exporters should also review the labeling and food packaging requirements of their destination markets.

Does an 11 Liter Olive Oil Tin Hold 11 Kilograms?

No. Eleven liters measure volume, not weight. The net weight depends on oil density, filling temperature and headspace. Producers should confirm the fill weight through a test using the actual oil.

Frequently Asked Questions - FAQ

How tall is the 11-liter olive oil tin?

The finished L444 11-liter model is 245 mm high. The BA mold's 200 mm value is a reference height.

Which closure and handle does the 11-liter tin use?

L444 is listed with a 32 mm practical closure and a green plastic handle.

Does the 11-liter olive oil tin have an internal lacquer?

The L444 datasheet entry lists no internal coating. Food-contact suitability and any requested alternative coating must be confirmed with the manufacturer.
