Product Description

16 Liter Nuts Tin

The 16 Liter nuts tin is a high-volume metal food package designed for hazelnuts, pistachios, almonds, cashews, mixed nuts, and similar products. For the AA mold, the technical sheet states a 232 mm diameter, 232 mm length, and 300 mm height. The same mold supports an applicable volume range of 16–21 liters. A metal handle helps with carrying, while Ø129 mm and Ø135 mm opening options can be combined with Ø129 Bonbon and Ø135 Bonbon lids. The body uses a welded side-seam construction, and several inside and outside seam-coating combinations are available. Manufactured by Kontensan, this model is suitable for brands looking for a nuts tin, nuts gift box, or high-volume branded metal package for wholesale and export use.

Key Features of the 16 L Nuts Tin

High Volume and Metal Handle

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 16–21 L volume range makes it suitable for larger quantities of nuts compared with standard retail packs. The metal handle supports easier carrying, while 0.28 mm, 0.30 mm, and 0.32 mm metal thickness options help support the larger body structure.

Bonbon Lid and Opening Options

The technical sheet lists Ø129 mm and Ø135 mm opening options together with Ø129 Bonbon and Ø135 Bonbon lid alternatives. This allows the package to be configured according to filling, closing, and handling requirements. For wholesale or export nut packaging, the selected opening and lid should match the product flow and filling process.

Welded Side-Seam Body and Seam Coating Options

The AA model uses a welded side-seam body. Seam coating options include lacquered inside and outside, powder-lacquered inside with uncoated outside, lacquered inside with uncoated outside, powder-lacquered inside with lacquered outside, uncoated inside with lacquered outside, or no seam coating. Form options include oil form + corner and cheese form + corner. These alternatives allow the package to be adapted to different production and use conditions.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options support branded nuts packaging for pistachio exports, premium product lines, and wholesale food projects.

Applications and Brand Value

The 16 L nuts tin can be used for larger quantities of hazelnuts, pistachios, almonds, cashews, and mixed nuts. Its capacity makes it useful for wholesale, export, producer packaging, and high-consumption businesses. Because the outer metal surface supports offset printing, the package can work as both a storage solution and a strong brand communication surface. Kontensan combines lid, lacquer, seam-coating, and form options to create flexible high-volume metal nut packaging.

Frequently Asked Questions - FAQ

What are the dimensions of the 16 L nuts tin?

The AA mold is listed with a 232 mm diameter, 232 mm length, and 300 mm height.

What volume range is available for this model?

The technical sheet states an applicable volume range of 16–21 liters for the AA mold.

Which lid options are available?

Ø129 Bonbon and Ø135 Bonbon lid options are listed together with Ø129 mm and Ø135 mm opening alternatives.

Does this model use a welded side-seam body?

Yes. The technical sheet identifies the body construction as welded side-seam and lists multiple seam-coating options.
