18 Liter Conical Paint & Thinner Tin Can AB

AB

Technical Specifications

Mold Code	AB
Diameter	232
Length	232
Height	170
Volume	9 - 21 lt

Applicable Features

Kalınlık

0,28 mm · 0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø32 mm · Ø39 mm · Ø42 mm · Ø56 mm · Ø70 mm

Kapak

Pratik 32 mm · Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Düz 40 mm Kulaklı · Ø39 Metal Tapa · Ø42 Metal Tapa · Ø56 Metal Tapa · Ø70 Metal Tapa · Pratik 32 mm, Ventilli · Düz 41 mm · Sibop

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yağ Forma+Köşe · Peynir Forma+Köşe

Dikiş/Kenet

Dikişli

Alternative Sizes

Product Description

18 Liter Conical Paint & Thinner Tin Can AB

18 Liter Conical Paint & Thinner Tin Can AB belongs to a conical metal container family for industrial paint and thinner packaging requirements. Kontensan offers this product in Paint & Thinner Tin Can under Industrial and Chemical Tin Cans, Pails, and Drums. The documented 18-liter example within the AB mold family is L174, a container specified for adhesives. Its technical features provide a reference for assessing high-volume chemical packaging needs. For paint and thinner filling, the chemical compatibility of the selected configuration must be established separately.

Conical Paint Container Dimensions and Metal Options

The AB mold family lists two horizontal reference dimensions of 232 mm, a reference height of 170 mm and a capacity range of 9–21 liters. Available sheet metal thicknesses are 0.28 mm, 0.30 mm, 0.32 mm and 0.38 mm. The finished L174 model has a height of 350 mm, a capacity of 18 liters and 0.32 mm sheet metal. The mold family is specified with a welded side seam; the L174 body profile is described as a cheese-style shape. When selecting conical metal paint tins, buyers should consider actual external dimensions, compatibility with filling equipment and the possibility of stacking empty containers. Stacking performance depends on the finished geometry.

Enamel Exterior and Pratik Closure System

L174 features an enamel exterior, a 42 mm opening, a Pratik 42 mm closure and a red plastic handle. Its technical record specifies no inner coating or separate seam coating. The AB family includes alternative inner lacquers, exterior finishes, metal plugs and vented closures. When ordering empty paint tins, buyers should consider the composition of water-based or solvent-based products, closure material and inner surface compatibility. The fact that L174 is specified for adhesives does not prove suitability for every paint or thinner. Required packaging tests and approvals for dangerous goods transport must be verified separately.

Wholesale Empty Paint Cans and Custom Printing

The AB family also lists the 14-liter K084 and 12-liter K090 adhesive containers. Both feature 0.32 mm sheet metal, an enamel exterior and a Pratik 56 mm closure. K084 has a red plastic handle, while K090 has a black one. Kontensan has manufactured metal packaging since 1980 and operates 25,000 square meters of indoor production space in Konya and Istanbul. Its metal offset printing infrastructure supports custom printed paint packaging in suitable configurations. When comparing paint tin manufacturers, focus on closure design, metal thickness and chemical compatibility rather than unit price alone. Share your technical specification and order quantity with Kontensan to request a quotation for wholesale metal paint containers.

Frequently Asked Questions - FAQ

What is the metal thickness of the 18-liter conical container?

The documented L174 adhesive container uses 0.32 mm sheet metal and has a finished height of 350 mm.

Which closure is used on the conical container?

L174 has a 42 mm opening and a Pratik 42 mm closure. Other closures are listed within the mold family.
Is this container suitable for every paint and thinner?
No. The category name alone does not establish compatibility. Chemical composition, packaging configuration and required approvals must be assessed.
