Yağ Forma+Köşe · Peynir Forma+Köşe

Product Description

18 L Roasted Meat Tin

The 18 L Roasted Meat Tin is a large-volume metal tin designed for roasted meat (kavurma) and meat products, with a wide bonbon mouth and a cornered welded body. With a 232 × 232 mm cornered base and a height that varies by volume, it offers filling from 4.5 to 21 liters. This product belongs to the Roasted Meat Tin Can series under Kontensan's Food Tin & Metal Packaging main category.

Wide Bonbon-Mouth Roasted Meat Tin

Since roasted meat contains meat pieces and fat, it needs a wide mouth. This roasted meat tin allows easy filling and emptying with Ø135 or Ø200 mm bonbon mouth options. Its cornered form makes stacking easy, while the welded body offers durability with heavy, oily contents.

Uses

The roasted meat tin suits kavurma producers, butchers and businesses with bulk production. Thanks to the same cornered form, it can also be used for the bulk packaging of other foods such as oil and cheese.

Coating and Printing Options

The roasted meat tin can be produced with food-grade coating options such as internal powder lacquer or fully lacquered. With metal offset printing, a custom brand design is applied to the outer surface.

Leak Resistance and Food Safety

The welded cornered body and food-grade lacquer systems support leak resistance and hygiene for oily contents throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal packaging from Türkiye to more than 30 countries. Production in alternative volumes such as 6, 9, 14 and 18 liters is also possible.

Frequently Asked Questions - FAQ

Why does a roasted meat tin have a wide (bonbon) mouth?

Because roasted meat consists of solid meat pieces and fat, a wide mouth makes filling and emptying easy. The Ø135 and Ø200 mm bonbon mouth options meet this need.

How much fits in an 18 liter roasted meat tin?

With a height that varies by volume, the mould offers filling from 4.5 to 21 liters. The weight depends on the fat and meat ratio of the roasted meat.

What is the advantage of the cornered (form) structure?

The cornered form lets tins be stacked efficiently side by side and on top of each other, saving space in handling and storage.

Can this tin also be used for oil and cheese?

Yes. With oil corner-form and cheese corner-form options, the same cornered structure can be used for packaging different food products.
