19 Liter Cheese and Butter Tin Pails YB

YB

Technical Specifications

Mold Code	YB
Diameter	270
Height	150
Volume	8 - 26 lt

Applicable Features

Kalınlık

0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Yok

Kapak

Yok (Ağzı Açık) · Kova Kapağı (Formalı) · Kova Kapağı (Formasız)

Kulp / Menteşe

Kova Kulpu

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Product Description

19 Liter Cheese and Butter Tin Pails YB

19 Liter Cheese and Butter Tin Pails YB are metal packaging options for wholesale quantities of yogurt, cheese and other dairy products when suitability has been confirmed. Kontensan offers this model in Cheese, Butter Tin Cans, and Pails under Food Tin & Metal Packaging. The metal body, carrying handle and different lid designs provide options for larger filling operations. For businesses searching for an empty cheese tin container, the correct package depends on the food type, filling conditions and internal coating.

What Are 19-Liter Metal Dairy Pails Used For?

The YB mold datasheet includes a 19-liter yogurt pail and an 18-liter cream and clarified butter pail. This means the family can be configured for different dairy foods. However, cheese brine, fat content, filling temperature and storage time affect the choice of food-contact lacquer. Buyers ordering wholesale cheese packaging should not compare capacity alone. Sample filling tests and lid compatibility are also important before production.

Technical Features of the 19 Liter Dairy Pail

The YB mold family has a diameter of 270 mm and a capacity range from 8 to 26 liters. Although the general datasheet shows a reference height of 150 mm, the listed L381 19-liter yogurt pail is 345 mm high. The L381 example uses 0.32 mm sheet metal, gold lacquer on the inside and outside, a shaped pail lid, a carrying handle, a seamed body and one reinforcing bead. Its seam has powder lacquer inside and lacquer outside. Across the family, sheet thickness options are 0.30 mm, 0.32 mm and 0.38 mm. An unshaped lid and double-bead construction are available as other family options.

Lid, Handle and Custom Printing Options

The L381 19-liter example has a shaped lid and a carrying handle. The wider YB family also offers unshaped lids, open-top versions, single or double reinforcing beads and offset printing. These features are not all standard on every version. For custom printed dairy packaging, manufacturers should confirm the exterior design, food-contact lacquer and seam treatment together. This allows the package to meet both branding and practical requirements.

How to Order Wholesale Cheese and Butter Pails

Prices for empty cheese tins and dairy pails depend on capacity, metal thickness, lid, handle, inner coating and printing. Buyers comparing suppliers of tin cans for dairy products should request quotes for the same technical configuration. Kontensan has manufactured metal packaging since 1980. Businesses looking for a 17 kg cheese tin should not treat liters and kilograms as equal. Product density and filling allowance must be tested using the actual food.

Frequently Asked Questions - FAQ

How tall is the 19-liter dairy pail?

The L381 19-liter yogurt pail in the datasheet is 345 mm high and belongs to the YB family with a 270 mm diameter.

Which metal thickness and lid does the 19-liter pail use?

The L381 example uses 0.32 mm metal and a shaped pail lid. The YB family also offers 0.30 mm and 0.38 mm metal and other lid options.

Can this pail be used for cheese or butter?

The YB family includes options for different dairy products. The selected coating and closure must be checked for compatibility with the food being packed.
