19 Liter Glucose Sherbet Tin Pail YB

YB

Technical Specifications

Mold Code	YB
Diameter	270
Height	150
Volume	8 - 26 lt

Applicable Features

Kalınlık

0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Yok

Kapak

Yok (Ağzı Açık) · Kova Kapağı (Formalı) · Kova Kapağı (Formasız)

Kulp / Menteşe

Kova Kulpu

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Product Description

19 Liter Glucose Sherbet Tin Pail YB

19 Liter Glucose Sherbet Tin Pail YB belongs to a metal pail family designed for industrial packaging of food ingredients such as glucose syrup and sherbet. Kontensan offers this packaging within Glucose, Sherbet Tin Cans, and Pails under Food Tin & Metal Packaging. The documented finished product in the YB family is the 19-liter L746 glucose and sherbet pail. For confectionery, bakery and dessert manufacturers, filling, emptying and handling requirements are as important as capacity when selecting a metal pail. The exact finished specifications of the 19-liter version must be confirmed separately before ordering.

Metal Glucose Pail Dimensions and Sheet Thickness

The YB mold family has a reference diameter of 270 mm, a reference height of 150 mm and a capacity range of 8–26 liters. Available sheet metal thicknesses are 0.30 mm, 0.32 mm and 0.38 mm. The finished L746 model is documented with an 19-liter capacity, a height of 320 mm and 0.32 mm sheet metal. The 150 mm mold reference height is not the finished pail height. When purchasing wholesale glucose pails, buyers should plan filling equipment, warehouse arrangements, pallet layouts and handling conditions using the actual finished dimensions. Because of glucose syrup density, volume in liters should not be treated as the same value as net filling weight in kilograms.

Shaped Pail Lid, Gold Lacquer and Single Body Rib

The L746 metal glucose pail has gold lacquer on both its inner and outer surfaces. Its welded side seam has powder lacquer inside and lacquer outside. The model features a shaped pail lid, a carrying handle and a single body rib, with no separate filling opening. The lid and body design should be reviewed according to the customer's filling and emptying methods. The handle helps users grip the container, but safe handling limits for a filled pail should be confirmed separately. The wider YB family also lists flat lids, open-top designs, double ribs and alternative surface coatings. These options are not standard features of L746. Food-contact suitability should be verified according to syrup composition and filling temperature.

Wholesale Glucose and Sherbet Pail Manufacturing

When sourcing empty glucose pails, buyers should compare prices based on the same capacity and technical specification. Kontensan has operated in the metal packaging industry since 1980. With a total indoor production area of 25,000 square meters in Konya and Istanbul and metal offset printing facilities, it can assess custom branded packaging requests for suitable configurations. When comparing glucose pail manufacturers, consider closure design, inner coating, sheet metal thickness, order quantity and shipping terms together. Custom offset printing is not listed as a standard feature of L746. For suitable syrup packaging, share your target capacity, filling temperature and packaging requirements with Kontensan to request a technical assessment and quotation.

Frequently Asked Questions - FAQ

What is the documented capacity of the glucose pail?

The YB family covers 8–26 liters. The documented finished L746 model holds 18 liters. The 19-liter version requires separate confirmation.

What are the sheet thickness and height of the glucose pail?

L746 uses 0.32 mm sheet metal and has a finished height of 320 mm. The reference mold diameter is 270 mm.

Which lid is used on the metal glucose pail?

L746 features a shaped pail lid, a carrying handle and a single body rib. Both inner and outer surfaces have gold lacquer.
