Product Description

19 Liter Margarine Tin Pail
The 19 liter margarine tin pail YB is a high-capacity metal food package designed for margarine, bakery margarine, and similar fat-based products during filling, storage, and transport. The YB technical sheet lists a Ø270 mm diameter, 150 mm main technical

height, and an applicable capacity range of 8–26 liters. This wide range allows the same mold family to support different filling volumes. Formed or unformed pail lid options, a pail handle, welded body, and single or double bead options make the package adaptable to different production needs. Manufactured by Kontensan, this margarine tin box can support industrial margarine, bakery margarine packaging, metal oil packaging, and other high-volume food applications. The phrase tin can can be used as a common English description, but the technical product form is clearly a pail.

Key Features of the 19 Liter Margarine Tin Pail

Ø270 mm Diameter and 8–26 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Margarine Tin Cans subcategory. The Ø270 mm diameter and 150 mm main technical height provide a large body format for high-volume filling projects. The 8–26 L applicable capacity range supports flexible production planning within the same mold family.

Formed and Unformed Pail Lid Options

The technical sheet lists two lid options: formed pail lid and unformed pail lid. No opening is listed. The handle field specifies a pail handle. This structure supports handling, closing, and transport requirements for larger margarine and oil packaging projects.

Welded Body, Single and Double Bead

The body is welded. Seam coating options include lacquered inside and outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Form / bead options are single-bead pail and double-bead pail. Inner and outer surfaces can use silver lacquer, gold lacquer, enamel, clear lacquer, and offset printing options.

Source Note

The main technical row lists 150 mm as the height, while the K061 alternative product row lists a 365 mm actual product height. These values are preserved separately as the main technical height and the alternative actual product height.

Frequently Asked Questions - FAQ

What is the technical capacity range of the 19 liter margarine tin pail?

The YB technical sheet lists an applicable capacity range of 8–26 liters.

Which lid options are available?

The source lists formed pail lid and unformed pail lid options.

Does this package have a handle?

Yes. The technical sheet lists a pail handle.

Why are there two height values, 150 mm and 365 mm?

The 150 mm value appears in the main technical row, while the K061 alternative product row lists a 365 mm actual product height.
