Product Description

19 Liter Paint & Thinner Tin Can Pail YB

19 Liter Paint & Thinner Tin Can Pail YB belongs to a wide-opening metal pail family designed for industrial paint and thinner packaging requirements. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The L025 model, specified for paint, has a 19-liter capacity, a finished height of 330 mm, 0.32 mm sheet metal, an unprofiled pail lid and a carrying handle. The wide-opening design can be considered for the filling and emptying operations of paint manufacturers. For thinner filling, chemical compatibility must be verified separately.

19-Liter Metal Paint Pail and Body Features

The YB mold family has a reference diameter of 270 mm, a reference height of 150 mm and a capacity range of 8.5–26.3 liters. Sheet metal options for the welded body are 0.28 mm, 0.30 mm, 0.32 mm and 0.38 mm. The finished L025 model has a height of 330 mm, 0.32 mm sheet metal and a single body rib. Single and double body ribs are production options within the mold family. When sourcing empty paint pails, buyers should consider finished dimensions alongside filling equipment, storage space and pallet arrangements. Nominal capacity in liters does not represent the filling weight in kilograms.

Pail Lid, Carrying Handle and Surface Finishes

L025 features an unprofiled pail lid and a carrying handle. It has no separate filling opening, inner or outer coating, or separate seam coating. The same family includes the 21-liter L380 paint pail. This model has a height of 400 mm, 0.32 mm sheet metal, a profiled lid and a single body rib; it has no inner or outer coating. The YB family also offers various inner lacquers, enamel and offset printed exterior options for consideration. When selecting metal paint tins or pails with lids, closure performance and chemical compatibility should be established according to the contents. Required packaging approvals for dangerous goods transport must be verified separately.

Wholesale Metal Paint Pail Manufacturing and Custom Printing

When comparing quotations from metal paint container manufacturers, capacity, metal thickness, lid type and order quantity should be based on the same technical specification. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Printing is not listed as a standard feature of L025. For wholesale empty paint cans and pails, share the properties of your filling product, target capacity, print design and order quantity with Kontensan to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What is the sheet metal thickness of the 19-liter paint pail?

L025 uses 0.32 mm sheet metal and has a finished height of 330 mm.

Which lid is used on the 19-liter paint pail?

L025 has an unprofiled pail lid, a carrying handle and a single body rib.

Is a larger paint pail available?

Yes. The 21-liter L380 model has a height of 400 mm, 0.32 mm sheet metal and a profiled lid.
