## Product Description

2.5 Liter Hexagon Candy Gift Tin Box BJ

The L450 – 2.5 Liter Hexagon Candy Gift Tin Box BJ is a decorative metal package with six sides, designed for confectionery and gift products. Kontensan offers this model in the Food Tin & Metal Packaging main category, under Candy Gift Tin Boxes. Its hexagonal shape stands apart from common round and square tins on retail shelves. It gives brands looking for a gift candy tin a distinctive packaging identity.

Hexagon Candy Tin Dimensions and Body Construction

The general BJ mold sheet lists a diameter of 216 mm, a length of 242 mm and a height of 55 mm. However, the L450 product row specifies a height of 65 mm, a capacity of 2.5 liters and a metal thickness of 0.24 mm. A thickness of 0.25 mm is also listed as an available option. This metal candy tin has a seamed body and a slip-on lid without a hinge. It has no hole, handle, seam coating or decorative cord. Buyers should check the version dimensions against their filling requirements.

Printed Confectionery Tin and Lacquer Options

The L450 version has gold lacquer on its inner and outer surfaces. The technical sheet also lists other internal coatings, including silver, pigment and clear lacquer. External options include offset printing. Brands planning a custom-printed candy tin or a logo-printed metal candy box should review the design and coating choice before production. Any surface touching food must be assessed for the specific sweets and contact conditions. This helps combine decorative packaging with practical requirements.

What to Check Before Ordering Wholesale Candy Gift Tins

The six-sided design can suit confectionery producers, gift brands and businesses preparing limited product collections. For wholesale candy tin orders, buyers should confirm quantity, artwork, surface finish and sample approval together. Candy tin prices may change with these production choices. The stated 2.5-liter volume does not represent a fixed filling weight in kilograms. Actual weight depends on the density, size and arrangement of sweets inside the tin.

Frequently Asked Questions - FAQ

What are the dimensions of the 2.5-liter hexagon candy tin?

The BJ general mold sheet lists 216 × 242 × 55 mm; the L450 version states a height of 65 mm and a capacity of 2.5 liters.

Does the hexagonal metal candy tin have a hinge?

No. L450 has a slip-on lid without a hinge and a seamed metal body.

Can a custom logo be printed on the hexagon candy tin?

Offset printing is listed among the external finish options. Printing and coating compatibility should be confirmed before ordering.
