Product Description

2.5 Liter Margarine Tin

The 2.5 liter margarine tin NA is a metal food package designed for margarine, bakery margarine, and similar fat-based products during filling, storage, and transport. The NA technical sheet lists a Ø140 mm diameter, 35 mm main technical height, and an

applicable capacity range of 0.5–3.7 liters. This means the same mold can support different filling volumes instead of only the nominal 2.5 L size. A Ø122 mm opening, Ø122 Bonbon and middle lid options, and a welded body make the package adaptable to different filling and closing needs. Manufactured by Kontensan, this margarine tin box can support bakery margarine packaging, metal oil packaging, industrial food use, and other professional applications. The phrase tin can is used only as a common English description; the source product name remains Margarine Tin.

Key Features of the 2.5 Liter Margarine Tin

Ø140 mm Diameter and 0.5–3.7 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Margarine Tin Cans subcategory. The Ø140 mm diameter and 35 mm main technical height provide a compact mold structure for small and medium filling volumes. The 0.5–3.7 L applicable capacity range supports flexible production planning within the same product family.

Ø122 Bonbon and Middle Lid Options

The technical sheet lists a Ø122 mm opening and ring option. Closure choices are Ø122 Bonbon and middle lid. No handle or hinge is listed. This makes the package suitable for compact margarine packaging projects where a carrying handle is not required.

Welded Body and Coating Options

The body is welded. Seam coating options include lacquered inside and outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Inner and outer surfaces can also use silver lacquer, gold lacquer, enamel, clear lacquer, and offset printing options. The source lists no form or bead.

Source Note

The NA main technical row lists a 35 mm height, while the L182 alternative product row lists a 174 mm actual product height. These values are preserved separately as the main technical height and the alternative actual product height.

Frequently Asked Questions - FAQ

What is the technical capacity range of the 2.5 liter margarine tin?

The NA technical sheet lists an applicable capacity range of 0.5–3.7 liters.

Which closure options are available?

The source lists Ø122 Bonbon and middle lid options.

Does this tin can have a handle?

No. The technical sheet lists no handle or hinge.

Why are there two height values, 35 mm and 174 mm?

The 35 mm value appears in the main technical row, while the L182 alternative product row lists a 174 mm actual product height.
