Product Description

2.5 Liter Nuts Tin

The 2.5 liter nuts tin AG is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, and mixed nuts. For the AG mold, the technical sheet states a 232 mm diameter, 232 mm length, and 41 mm height. The same mold supports an applicable volume range of 2.2–5.9 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal nut package with a wide surface and low-profile shape.

Key Features of the 2.5 Liter Nuts Tin

Wide Surface and Low-Profile Nuts Tin

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 232 × 232 mm size and 41 mm height give the nuts tin a wide, low-profile form. This supports organized product placement and creates a large branding area for premium retail, corporate gift, and export packaging projects.

Slip Lid and Lock-Seamed Nuts Tin Body

The AG model uses a slip lid. The nuts tin body is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, hinge, or bead. Available metal thickness options are 0.24 mm and 0.25 mm. This simple structure makes the nuts tin practical for serial production while keeping a clean package appearance.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 2.5 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its wide surface supports neat product presentation, while offset printing turns the nuts tin into a strong brand communication surface. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, wholesale, export, and corporate gift projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 2.5 liter nuts tin?

The AG mold is listed with a 232 mm diameter, 232 mm length, and 41 mm height.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 2.2–5.9 liters for the AG mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can custom printing be applied to the nuts tin?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the nuts tin to be customized for the brand and product series.
