Product Description

2.5 Liter Nuts Tin

The 2.5 liter nuts tin BN is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the BN mold, the technical sheet states a 221 mm diameter, 221 mm length, 35 mm mold height, and an applicable volume range of 1.7–5.4 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. The decorative bead adds stronger visual character to the wide metal surface. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal package with a broad format and flexible capacity.

Key Features of the 2.5 Liter Nuts Tin

Wide Nuts Tin Body and Flexible Capacity

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 221 × 221 mm body gives the nuts tin a wide surface, while the 1.7–5.4 L applicable volume range allows the same mold family to support different filling quantities. This flexibility is useful for retail, gift, and export packaging projects.

Slip Lid and Lock-Seamed Nuts Tin Body

The BN nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, or hinge. Available metal thickness options are 0.24 mm and 0.25 mm. This clean structure keeps the nuts tin suitable for serial production.

Decorative Bead and Offset Printing

The decorative bead adds visual movement to the wide metal surface and helps the nuts tin stand apart from plain-body alternatives. The inner surface can use silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer.

Applications and Brand Value

The 2.5 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its wide body provides a strong area for offset printing, while the decorative bead gives the nuts tin more visual character. Kontensan combines coating and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 2.5 liter nuts tin?

The BN technical sheet lists a 221 mm diameter, 221 mm length, and 35 mm mold height. The alternative 3 L octagonal sample product is listed with an actual height of 62 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 1.7–5.4 liters for the BN mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Does this nuts tin have a decorative bead?

Yes. The technical sheet lists a decorative bead in the form / bead field.
