Product Description

2 Liter Cookies and Baklava Tin Box
The 2 liter cookies and baklava tin box UZ is a metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar food products. For the UZ mold, the technical sheet states a diameter of 190 mm and a mold

height of 36 mm. The same mold supports an applicable volume range of 1–7 liters. A slip lid provides simple opening and closing, while the lock-seamed body supports a clean structure suitable for serial production. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or branded metal package that combines a compact diameter with practical volume.

Key Features of the Cookies and Baklava Tin Box

Lock-Seamed Metal Food Packaging

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options help the tin keep a stable form. According to the technical sheet, the body construction is lock-seamed and no seam coating is applied. The product has no hole, handle, hinge, or bead. This simple structure is suitable for wholesale cookie tin and wholesale baklava tin projects where standardized production and a clean package appearance are important.

Practical Slip Lid

The 2 L model uses a slip lid. This lid gives easy access to cookies, baklava, and similar food products while keeping a traditional metal tin appearance. The absence of a handle and hinge keeps the package profile simple. For pastry shops, dessert producers, boutique food brands, and corporate gift projects, this structure supports practical storage and presentation.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options give brands more freedom to use logos, product visuals, and corporate colors on printed baklava tins and branded cookie tins.

Applications and Brand Value

The 2 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 190 mm diameter provides a compact base for organized product presentation. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. The reusable metal body can also remain useful after the food is consumed. Kontensan combines different lacquer and printing options with serial production capability, giving food brands a practical way to balance technical function with strong shelf presentation.

Frequently Asked Questions - FAQ

What are the dimensions of the 2 liter cookies and baklava tin box?

The UZ mold is listed with a diameter of 190 mm and a mold height of 36 mm. The 2 L sample product is listed with a height of 80 mm.

What is the applicable volume range of the UZ mold?

The technical sheet states an applicable volume range of 1–7 liters for the UZ mold. The 2 L product is one option within this mold family.

Is this model lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can custom printing be applied to the box?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the package to be customized for the brand and product series.
