Product Description

2 Liter Hexagon Candy Gift Tin Box AW

The L443 – 2 Liter Hexagon Candy Gift Tin Box AW is a decorative metal package with a six-sided shape that gives confectionery products a distinctive look. Kontensan, which has produced metal packaging since 1980, offers this model under Food Tin & Metal Packaging and the Candy Gift Tin Boxes category. For brands looking for a gift candy tin, the hexagonal shape creates a different shelf appearance from common round boxes.

Hexagon Candy Tin Dimensions and Lid Design

The AW mold has a diameter of 190 mm, a length of 217 mm and a height of 65 mm. The L443 version has a nominal capacity of 2 liters and uses 0.24 mm metal. The technical sheet also lists 0.25 mm as an available thickness. The body has a seamed joint, and the tin uses a slip-on lid. This lidded confectionery tin has no hole, handle, hinge or decorative cord. Buyers should consider both the stated volume and the size of the sweets when planning the filling process.

Printed Candy Tin and Coating Options

The L443 version has a gold lacquer finish inside and outside. The technical sheet lists other internal coatings, including silver, pigment and clear lacquers. Offset printing is also available among the external finish options. These choices give brands opportunities to develop a custom-printed candy tin or a logo-printed metal candy box. However, the selected printing and coating combination must be confirmed before production. Any coating touching food should also be checked for suitability with the specific sweets being packed.

How to Plan Wholesale Candy Tin Orders

This decorative confectionery tin can suit candy manufacturers, gift brands and businesses preparing limited packaging collections. For wholesale candy tin orders, buyers should agree on quantity, artwork, lacquer finish and sample approval. Candy tin prices may depend on these production choices. A nominal capacity of 2 liters does not mean a fixed filling weight in kilograms. The actual weight depends on the density of the sweets and how they are arranged inside the box.

Frequently Asked Questions - FAQ

What are the dimensions of the 2-liter hexagon candy tin?

The tin measures 190 mm in diameter, 217 mm in length and 65 mm in height, with a nominal capacity of 2 liters.

Does this hexagonal metal candy tin have a hinge?

No. The L443 version has a slip-on lid without a hinge and a seamed metal body.

Can a custom logo be printed on the candy gift tin?

The technical sheet lists offset printing as an outer finish option. Printing and coating details should be confirmed before production.
