Product Description

2 Liter Nuts Tin

The 2 liter nuts tin DG is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the DG mold, the technical sheet states a 256 mm diameter, 168 mm length, and 35 mm mold height. The same mold supports an applicable volume range of 1.5–5 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal nut package with a wide surface and medium-volume format.

Key Features of the 2 Liter Nuts Tin

Wide Surface and Flexible Nuts Tin Volume

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 256 × 168 mm size gives the nuts tin a wide and balanced form, while the 1.5–5 L applicable volume range supports different product quantities within the same mold family. This flexibility supports retail, corporate gift, regional food, and wholesale packaging projects.

Slip Lid and Lock-Seamed Nuts Tin Body

The DG nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, hinge, or bead. Available metal thickness options are 0.24 mm and 0.25 mm. This simple construction keeps the nuts tin practical for serial production and gives the package a clean appearance.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 2 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its wide metal surface supports organized product presentation, while offset printing turns the nuts tin into a visible brand communication surface. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 2 liter nuts tin?

The DG mold is listed with a 256 mm diameter, 168 mm length, and 35 mm mold height. The alternative 2 L sample product is listed with a height of 45 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 1.5–5 liters for the DG mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can custom printing be applied to the nuts tin?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the nuts tin to be customized for the brand and product series.
