Product Description

2 Liter Nuts Tin

The 2 liter nuts tin DJ is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the DJ mold, the technical sheet states a 256 mm diameter, 168 mm length, and 35 mm mold height. The same mold supports an applicable volume range of 1.5–5.1 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. A key detail that separates this model from similar plain-body tins is the decorative bead. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal nut package with a wider surface and stronger shelf character.

Key Features of the 2 Liter Nuts Tin

Decorative Bead for Stronger Nuts Tin Presentation

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. The decorative bead gives the nuts tin more visual character and helps separate it from simple flat-body packaging. Its 256 × 168 mm size creates a broad printing area, while the 1.5–5.1 L applicable volume range supports different packaging quantities within the same mold family.

Slip Lid and Lock-Seamed Nuts Tin Body

The DJ nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, or hinge. Available metal thickness options are 0.24 mm and 0.25 mm. This simple body structure keeps the nuts tin practical for serial production while the decorative bead adds a stronger visual detail.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 2 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its broad surface supports strong offset printing, while the decorative bead gives the nuts tin a more distinctive shelf appearance. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 2 liter nuts tin?

The DJ mold is listed with a 256 mm diameter, 168 mm length, and 35 mm mold height.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 1.5–5.1 liters for the DJ mold.

Does this nuts tin have a decorative bead?

Yes. The technical sheet lists a decorative bead in the form / bead field.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
