## Product Description

2 Liter Olive Oil Tin Can MA

2 Liter Olive Oil Tin Can MA is a metal packaging option designed for producers filling olive oil in two-liter volumes. Kontensan offers this product within Olive Oil Tin Cans under Food Tin & Metal Packaging. When choosing olive oil tin packaging, buyers should consider more than capacity. Closure compatibility with filling equipment, internal coating and finished body dimensions all matter. Companies ordering empty olive oil tins should distinguish possible features of a mold family from the confirmed specifications of a finished container.

Technical Features of the 2 Liter Olive Oil Tin

The MA mold datasheet lists a diameter of 105 mm, a reference height of 36 mm and a capacity range from 0.3 to 2.2 liters. However, the finished two-liter L250 model is 249 mm high. L250 uses 0.24 mm sheet metal, gold lacquer on the inside and outside, a seamed body and a 32 mm opening. It has a matching practical closure with a green cap and no handle. The technical record lists no seam coating or shaped reinforcement. The 36 mm reference value is not the finished container height. Buyers should use the confirmed 249 mm measurement when planning an order.

Choosing Closures and Inner Lacquer for Olive Oil

Metal olive oil packaging reduces direct light exposure, but food-contact suitability, secure sealing and appropriate storage remain important for protecting oil quality. The MA mold family lists 32 and 42 mm openings, several practical and screw-cap alternatives, and different lacquer finishes. These options are not standard features of L250. Its confirmed configuration includes a 32 mm practical closure and a gold-lacquered interior. Filling-line compatibility should be checked before production.

Wholesale Olive Oil Tins, Printing and Prices

For wholesale olive oil tins, buyers should define capacity, metal thickness, closure, internal coating, printing requirements and order quantity in one quotation. Kontensan's metal offset printing equipment can support custom printed olive oil tins on suitable configurations. However, custom printing is not documented as standard for L250. Empty olive oil tin prices should only be compared between products with equivalent specifications. Exporters should also check food packaging and labeling requirements in the destination country.

Frequently Asked Questions - FAQ

How tall is the 2-liter MA olive oil tin?

The finished L250 model is 249 mm high. The MA mold's 36 mm figure is a reference measurement only.

Which closure does the 2-liter olive oil tin use?

L250 has a 32 mm practical closure and a green cap. No handle is listed.

Does the 2-liter olive oil tin have gold lacquer?

The L250 product record lists gold lacquer on both internal and external surfaces. Food-contact suitability should be confirmed for the intended use.
