Product Description

2 Liter Paint & Thinner Tin Can NA
2 Liter Paint & Thinner Tin Can NA is a metal container option with a ring-type paint lid and a handle-free body for manufacturers requiring two-liter paint packaging. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical

Tin Cans, Pails, and Drums. The NA family lists sheet metal thicknesses of 0.24 mm and 0.25 mm, along with various surface finishes. Its wide opening can be considered in terms of paint filling and access to the contents during use.

Body Features of the 2-Liter Welded Paint Container

The NA mold family has a reference diameter of 140 mm, a reference height of 35 mm and a stated capacity range of 0.3–2 liters. The welded paint container design has no carrying handle or additional body ribbing. The L182 paint container, listed as an alternative in the same technical datasheet, has a capacity of 2.5 liters, a finished height of 174 mm and 0.24 mm sheet metal. This model falls outside the stated mold capacity range. The exact finished height of the two-liter product must be confirmed separately. When sourcing empty metal paint tins, consider closing equipment dimensions, filling line clearance and carton arrangements.

Ring-Type Paint Lid and Lacquered Metal Packaging

The NA family is specified with a ring opening and a paint lid. The L182 example features a gold lacquered interior and an enamel exterior, with no separate seam coating. The mold family lists alternative inner coatings such as pigment, clear and silver lacquers, along with enamel, decorative lacquer and offset printed exterior finishes. When selecting metal paint tins with lids, chemical compatibility between the inner surface and the contents and closure performance must be assessed according to the product formulation. Suitability for thinner and required packaging approvals for dangerous goods transport must be verified separately.

Wholesale Empty Paint Cans and Custom Printing

When working with metal paint container manufacturers, do not evaluate packaging based on capacity alone. Sheet thickness, lid design, inner lacquer, exterior finish and order quantity directly affect purchasing decisions. Kontensan has manufactured metal packaging since 1980 and exports to more than 30 countries. With 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities, it considers custom printed paint packaging requests in suitable production configurations. To request a quotation for wholesale empty paint cans, share your target filling volume, chemical product characteristics, print design and order quantity with Kontensan.

Frequently Asked Questions - FAQ

Which sheet thicknesses are available for the two-liter paint container?

The NA family lists 0.24 mm and 0.25 mm sheet metal options. Finished product specifications are confirmed before ordering.

Which lid is used on the two-liter paint container?

The NA family is specified with a ring-type paint lid and a handle-free body.

Can paint containers be custom printed?

Metal offset printing can be considered in suitable production configurations.
