Yok

### Product Description

## 2 Liter Slip Lid Cookie and Baklava Tin Box

The 2 liter slip lid cookie and baklava tin box is a metal packaging solution that keeps cookies, baklava, and syrup-based desserts fresh, hygienic, and protected from air from production to the final customer. Thanks to its slip lid construction, the lid and body form an airtight seal that protects the product from moisture, odor, and outside factors.

### Features of the Cookie and Baklava Tin Box

Kontensan has manufactured Food Tin & Metal Packaging since 1980, and offers this 2 liter slip lid cookie and baklava tin box within the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes sub-category. Produced with mold code BC and a 215 mm diameter, the tin body has a thickness of 0.24-0.25 mm, which keeps the box resistant to impact during transport and stacking.

### What Is a Slip Lid System?

A slip lid system is a sealing method where the box body and lid are mechanically interlocked to form an airtight joint. This system keeps air out of the box, preserving the moisture balance of syrup-based desserts and keeping cookies and biscuits crisp for a long time. A slip lid provides a more reliable seal than gluing or welding methods.

### Coating and Printing Options

The cookie and baklava tin box is manufactured with a range of food-contact safe interior coatings, including silver lacquer, gold lacquer, clear lacquer, or pigment lacquer. On the exterior, offset printing lets brands carry their product identity directly on the box. The interior coatings used in this production process are selected in line with food safety standards, so the surface in direct contact with the contents does not affect the product's taste or smell.

### Applications and Export

The cookie and baklava tin box serves pastry shops, confectioners, baklava producers, and bulk food manufacturers as both a shelf-ready and gift package. Its tin structure protects products from crushing and breakage during transport, and a printed exterior adds shelf appeal for brands. Kontensan manufactures these boxes at its Konya and Istanbul facilities and exports them to more than 30 countries.

### Frequently Asked Questions - FAQ

What products is the cookie and baklava tin box used for?

This product is designed for cookies, baklava, syrup-based desserts, and similar pastries. Its slip lid structure reduces the risk of leaks with syrup-based products.

What is the exact volume of the 2 liter box?

The mold code BC box is produced in different volumes ranging from 1.6 to 3.2 liters; this product is the 2 liter version.

Why should you choose a slip lid?

A slip lid keeps air out of the box, preserving the product's freshness and crispness, and it also provides a leak-proof seal during transport.

Is this product food-contact safe?

Yes, the interior coating options are made with food-contact safe lacquers, ensuring the product is stored hygienically.
