Product Description

2 L Tea and Coffee Tin

The 2 L Tea and Coffee Tin is a metal tea tin that stands out with its rectangular, flat form. With a 103 × 166 mm base and 36 mm height, it suits fill volumes ranging from 0.6 to 3.3 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

What Is the Rectangular Tea and Coffee Tin Used For?

Thanks to its rectangular form, this tea tin is ideal for tea bags, chocolate, biscuits and gift sets. Its flat structure makes stacking easy, while its wide top surface gives a strong printing area for brands. It is also handy for the tidy presentation of dry foods such as tea and coffee.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. A metal coffee tin is a solution that provides both protection and shelf value.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. The rectangular outer surface allows custom brand visuals to be applied widely with metal offset printing.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Alternative moulds, such as a 3 liter version, can also be produced to fit your needs.

Frequently Asked Questions - FAQ

Is a tin box suitable for storing tea bags?

Yes. The rectangular, flat form is ideal for the tidy placement of tea bags and sachets; the metal body protects them from light and moisture.

What is a rectangular tea and coffee tin used for?

It suits tea and coffee as well as chocolate, biscuits, Turkish delight and gift sets. Its flat form is an advantage in shelf and gift presentations.

How much product fits in a 0.6–3.3 liter tin?

Capacity depends on the product's density. This range suits medium-size presentation of tea, coffee or confectionery.

Does a tin box keep tea and coffee fresh?

The metal body blocks light completely, while the slip-on lid reduces air contact. In this way, a tin box helps keep tea and coffee fresh.
