Product Description

2 L Tea and Coffee Tin

The 2 L Tea and Coffee Tin is a decorative, corded metal tea tin that stands out with its wide round, shallow form. With a Ø140 mm diameter and 35 mm height, it suits fill volumes ranging from 0.5 to 3.5 liters. This product belongs to the Tea, Coffee, and Hot

Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Round Decorative Tea and Coffee Tin

Thanks to its wide round base, this tea tin is ideal for an elegant presentation of biscuits, chocolate, Turkish delight and mixed treats. The decorative cordon adds an elegant frame to the lid and body. It is a coffee tin preferred for tea and coffee as well as gift presentations.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. A metal coffee tin provides both protection and a visual presentation value.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. The wide round lid surface allows full custom brand visuals to be applied with metal offset printing.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in different sizes and forms is also possible.

Frequently Asked Questions - FAQ

What products is a round decorative tin suitable for?

Its wide round base suits biscuits, chocolate, Turkish delight and mixed treats, as well as tea and coffee. It gives an elegant look in gift and shelf presentations.

How much product fits in a 0.5–3.5 liter tin?

Capacity depends on the product's density. This wide range offers flexibility for both small and larger treat presentations.

Can printed tins with a decorative cordon be produced?

Yes. With metal offset printing and decorative cordon options, custom, printed round tea and coffee tins can be produced.

Should tea be stored in a tin can or a glass jar?

A tin can is opaque, while a glass jar lets light through. In terms of light protection, a tea tin is an advantage in preserving the color and aroma of tea.
