20 Liter Paint & Thinner Tin Can Barrel XA YB

XA

Technical Specifications

Mold Code	XA
Diameter	277
Height	150
Volume	8.8 - 28 lt

Applicable Features

Kalınlık

0,28 mm · 0,30 mm · 0,32 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø42 mm · Ø56 mm

Kapak

Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Ø42 Metal Tapa · Ø56 Metal Tapa

Kulp

Kova Kulpu · Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Dikiş/Kenet

Dikişli

Product Description

20 Liter Paint & Thinner Tin Can Barrel XA YB

20 Liter Paint & Thinner Tin Can Barrel XA YB belongs to the XA mold family for high-volume metal packaging requirements in the paint and thinner industry. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The nominal twenty-liter capacity can be considered for packaging professional chemical products. Different sheet metal thicknesses, closure openings and body ribs allow buyers to consider a configuration that matches filling lines and operating conditions. The documented finished example in the technical datasheet is the 21-liter K032 thinner container.

Industrial Paint Drum Dimensions and Body Design

The XA mold family has a reference diameter of 277 mm, a reference height of 150 mm and a capacity range of 8.8–28 liters. Sheet metal thicknesses of 0.28 mm, 0.30 mm and 0.32 mm are specified for the welded body. Single and double body rib options are available. The finished K032 model has a height of 350 mm, a capacity of 21 liters and 0.32 mm sheet metal. This model features a double-ribbed body. The exact height and other finished dimensions of the twenty-liter drum must be confirmed according to the order configuration. When sourcing empty paint tins and drums, buyers should use finished product dimensions to plan filling equipment, pallet arrangements and warehouse layouts.

Closure, Handle and Coating Options for Thinner Drums

The XA family lists 42 mm and 56 mm openings, Pratik closures, vented closures, a screw closure and metal plug alternatives. Plastic handles or pail handles can be considered. The K032 model features a 42 mm opening, a Pratik 42 mm closure, a red plastic handle and an enamel exterior. It has no inner coating or separate seam coating. These features apply to the 21-liter example. When selecting metal paint tins or drums with closures, solvent composition, inner surface compatibility and closure performance should be considered together. Required packaging tests and approvals for dangerous goods transport must be verified separately.

Wholesale Metal Paint Drums and Custom Printing

When comparing quotations from metal paint packaging manufacturers, consider target capacity, sheet thickness, closure system, coating and order quantity alongside unit price. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging and drums in suitable configurations. The standard exterior of K032 is enamel. For wholesale empty paint cans and drums, share your product composition, target volume, closure preferences and print design with Kontensan to request a technical assessment and manufacturing quotation.

Frequently Asked Questions - FAQ

Which metal thicknesses are available for the 20-liter paint drum?

The XA mold family lists 0.28 mm, 0.30 mm and 0.32 mm options. The finished product thickness is confirmed before ordering.

Which closure options are available for thinner drums?

The mold family includes Pratik closures and metal plug options for 42 mm and 56 mm openings.

What are the features of the 21-liter thinner drum?

K032 has a height of 350 mm, 0.32 mm sheet metal, an enamel exterior, a Pratik 42 mm closure and a red plastic handle. Its body has two ribs.
