Product Description

3.5 Liter Flat Octagonal Candy Tin Box

The 3.5 liter flat octagonal candy tin box BP is a metal food package designed to protect, transport, and present Turkish delight, chocolate, dragees, and other confectionery products. For the BP mold, the technical sheet lists a 274 mm diameter, 188 mm length, 70 mm height, and a fixed 3.5 liter volume. The flat octagonal shape creates a wider and lower presentation format than a conventional round tin. A slip lid supports easy opening and closing, while the lock-seamed body provides a clean structure for serial production. The product has no hole, handle, hinge, seam coating, form, or bead. Manufactured by Kontensan, this model is suitable for Turkish delight tin box, Turkish delight gift box, chocolate tin, chocolate tin box, Turkish chocolate box, and premium confectionery packaging projects.

Key Features of the 3.5 Liter Flat Octagonal Candy Tin Box

274 × 188 mm Flat Octagonal Form

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Turkish Delight, Chocolate and Dragee Tin Boxes subcategory. The 274 × 188 mm footprint and 70 mm height create a wide, low-profile package. This format works well for Turkish delight present, Turkish delight gift box, chocolate tin, and premium retail packaging where shelf impact and presentation space matter.

Slip Lid and Lock-Seamed Body

The BP tin box uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. Available metal thickness options are 0.24 mm and 0.25 mm. The form / bead field is listed as none. This simple construction gives the package a clean and reliable base for branded serial-production projects.

Offset Printing and Coating Options

The inner surface can use silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. The broad flat surface gives brands strong space for logos, product graphics, and campaign designs.

Applications and Brand Value

The 3.5 liter flat octagonal candy tin box can be used for Turkish delight, chocolate, dragees, confectionery, and regional food products. Its wide top surface gives brands more visible space for graphics and helps the package stand out in gift and premium retail ranges. The flat octagonal shape also separates the product from common round tins. Offset printing supports direct application of logos, product graphics, and brand colors on the metal surface. Kontensan combines coating and printing options with serial production capability for retail, export, corporate gift, and wholesale packaging projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 3.5 liter flat octagonal tin box?

The BP technical sheet lists a 274 mm diameter, 188 mm length, and 70 mm height.

What is the volume of this tin box?

The technical sheet lists the product volume as 3.5 liters.

Is this tin box lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Does this model have a decorative bead?

No. Both the main technical line and the alternative sample state that there is no form or bead.
