Product Description

3 Liter Half-Octagonal Candy Gift Tin Box

Kontensan manufactures the 3-liter half-octagonal candy gift tin box FP as part of its Candy Gift Tin Boxes range within Food Tin & Metal Packaging. This candy tin is designed for branded confectionery presentation. Its 210 mm diameter, 250 mm length and 72 mm height create a distinct shape, while its 3-liter capacity provides space for selected sweets. Volume is measured in liters; the actual weight of candy depends on product density.

Decorative Confectionery Tin for Gift Presentation

The half-octagonal shape gives brands an alternative to traditional square or round boxes. A slip-on lid makes this decorative confectionery tin suitable for gift sets and seasonal collections. It can be considered for candies, dragées, chocolates and Turkish delight, provided the chosen inner coating meets the food-contact requirements of the packed product. Its unusual shape helps the package stand out without relying only on graphic design.

Custom Printed Candy Tin and Lacquer Options

The technical datasheet includes offset printing among the available outer finishes. This supports projects for a printed candy tin with a logo or custom artwork. Variant L513 has gold lacquer on both the inside and outside, giving the metal a decorative finish. The final printing method, colors and surface treatment must be confirmed for each production order. A candy tin can search may describe similar packages, but this product is specifically a gift tin box.

Technical Structure of the 3 Liter Candy Gift Tin Box

The FP mold has a volume of 3 liters. Available metal thicknesses are 0.24 mm and 0.25 mm. Variant L513 uses 0.24 mm sheet metal, gold lacquer on both surfaces, a slip-on lid and a seamed body. It has no handle, hinge, hole or cord. When selecting a candy gift tin box, buyers should check product compatibility, filling arrangement and the planned exterior print, not just its appearance.

Wholesale Candy Tin Orders

For wholesale candy gift tin orders, box dimensions, coating and printing choices affect the final quotation. Comparing prices based only on capacity can be misleading. Producing metal packaging since 1980, Kontensan offers this model with fixed dimensions and several finish options to meet different branding needs. Businesses can use it for confectionery gift collections that require a recognizable shape and a consistent presentation.

Frequently Asked Questions - FAQ

How many kilograms of candy fit in a 3-liter gift tin?

Three liters describes volume rather than weight. The filling weight depends on the type, size and arrangement of the sweets.

Can the half-octagonal candy tin have custom printing?

Yes. Offset printing is listed as an available outer finish. Artwork, printing area and coating choices must be approved before production.

What are the lid type and metal thickness?

The box has a slip-on lid. Available thicknesses are 0.24 mm and 0.25 mm, while variant L513 uses 0.24 mm metal.
