Product Description

3 Liter Olives and Pickles Tin Box OA

3 Liter Olives and Pickles Tin Box OA is a metal packaging option for olive producers who need containers for filling and transport. Kontensan offers the product within Olives, and Pickles Tin Cans under Food Tin & Metal Packaging. Choosing an empty olive tin requires more than checking volume. Brine ingredients, food-contact suitability of the inner lacquer and the closing system also matter. Use for pickles depends on confirmed compatibility with acidic contents.

Technical Features of the 3 Liter Olive Tin

The OA mold family has a diameter of 153 mm, a reference height of 38 mm and a capacity range from 0.7 to 5.2 liters. However, the finished K097 three-liter olive tin is 160 mm high. K097 uses 0.24 mm sheet metal with gold lacquer inside and outside. Its seamed body has a 110 mm opening and a matching bonbon-style lid. It has a shaped body reinforcement and no handle. The K098 version in the same datasheet holds 3.5 liters and measures 190 mm high. These dimensions must not be assigned to the three-liter K097 model.

Inner Lacquer and Lid Options for Brined Olives

Brined olive packaging may touch liquid containing salt and acid, so the inner coating is important. The OA mold family lists 0.22, 0.24 and 0.25 mm metal, several lacquer finishes, and 110 or 122 mm openings with matching bonbon-style lids. These family options are not all standard on K097. Buyers considering an empty pickle tin should also review the product's acidity and storage period before confirming its coating.

Wholesale Empty Olive Tins and Custom Printing

Before ordering wholesale empty olive tins, buyers should define capacity, lid size, sheet thickness, lacquer and production quantity in the same quotation. Kontensan's metal offset printing facilities can support branded packaging on suitable versions, but printing is not automatically standard on K097. Empty olive tin prices can only be compared fairly when specifications are the same. Businesses searching for a 3 kg olive container should not treat liters and kilograms as equal; sample filling with olives and brine is necessary.

Frequently Asked Questions - FAQ

How tall is the 3-liter OA olive tin?

The finished K097 three-liter version is 160 mm high. The OA mold's 38 mm measurement is a reference height.

Which lid does the 3 L olive tin use?

K097 has a 110 mm opening and a matching bonbon-style lid. It has no handle.

Can the three-liter tin be used for pickles?

This depends on whether the inner lacquer suits the pickle product's salt and acid levels. Food-contact suitability should be checked before filling.
