Product Description

3 Liter Paint & Thinner Tin Can OA

3 Liter Paint & Thinner Tin Can OA is a metal container with a ring-type paint lid for manufacturers looking for three-liter paint packaging. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The L031 model, specified for paint, has a finished height of 185 mm, 0.24 mm sheet metal and a handle-free body. The same mold family also includes packaging for thinner and putty with different closure systems.

Technical Features of the 3-Liter Metal Paint Container

The OA mold family has a reference diameter of 153 mm, a reference height of 38 mm and a capacity range of 0.7–5.2 liters. Sheet metal options of 0.24 mm and 0.25 mm are specified for welded paint container production. L031 has no inner or outer coating, separate seam coating, handle or body ribbing. Its ring-type paint lid can be considered for filling operations that require wide-opening packaging. When purchasing empty metal paint tins, it is important to compare finished container dimensions with filling and closing equipment. Carton and pallet arrangements should also be planned according to these dimensions. Product density is one of the factors that determine handling weight after filling.

Closure Options for Paint, Thinner and Putty

In addition to paint lids, the OA family lists 32 mm and 42 mm openings, Pratik closures, vented closures, a screw closure, a metal plug and slip-on lids. The four-liter L702 thinner tin has a height of 230 mm, 0.24 mm sheet metal, a Pratik 42 mm closure and a red plastic handle. The two-liter L928 putty container has a height of 109 mm, 0.24 mm sheet metal, a slip-on lid and no handle. Both alternatives have no inner or outer coating. When selecting metal paint tins with lids, chemical compatibility and required transport approvals must be verified for the intended contents.

Wholesale Empty Paint Cans and Custom Printing

When working with metal paint container manufacturers, specify closure type, sheet thickness and surface finish together with order quantity. The OA family includes inner coating alternatives such as gold, silver, pigment and clear lacquers, along with enamel and offset printed exterior finishes. Kontensan has manufactured metal packaging since 1980 and exports to more than 30 countries. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. For wholesale empty paint cans, share your target capacity, product characteristics and brand design to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What are the dimensions of the three-liter paint container?

L031 has a finished height of 185 mm and a sheet thickness of 0.24 mm. The mold reference diameter is 153 mm.

Which lid is used on the three-liter paint container?

L031 has a ring-type paint lid and no handle.

Are alternative containers available for thinner and putty?
Yes. The same family includes the four-liter L702 thinner container with a Pratik 42 mm closure and the two-liter L928 putty container with a slip-on lid.
