Product Description

3 Liter Pralin Waffle Tin Box OA

The 3 Liter Pralin Waffle Tin Box OA is a metal box with a slip-on lid, designed for packaging praline, waffle sauce and puree products. Kontensan manufactures this model within its Praline Waffle Puree Tin range under Food Tin & Metal Packaging. With a target volume of three liters, a simple body without a carrying handle and several exterior finish options, it offers an alternative to metal pails. Buyers comparing praline tin manufacturers should check the internal coating as carefully as the box design.

Which Products Can a Metal Praline Tin Box Hold?

A metal praline box may be considered for praline fillings and thick dessert ingredients. It may also be an option for food manufacturers looking for waffle sauce tins or fruit puree packaging. However, suitability is not automatic. The product's fat and acid content, filling temperature and expected storage period affect the choice of internal lacquer. Direct food-contact requirements must be checked before full production begins.

Technical Design of the Slip-On Lid Tin Box

The OA mold family datasheet lists a diameter of 153 mm, a reference height of 38 mm and a capacity range from 0.7 to 5.2 liters. These figures cover the mold family; the exact height of the three-liter box must be confirmed separately. Available sheet thicknesses are 0.24 mm and 0.25 mm. The box has a slip-on lid and a seamed body, without a handle, hinge, hole or reinforcing bead. Internal finishes include gold, silver and different pigment lacquers. Exterior options include enamel, lacquer and offset printing. The L941 example in the datasheet is a two-liter box, so its 109 mm height should not be used as the dimension of this three-liter product.

Custom Printed Praline Tin Box for Brand Presentation

Offset printing can place a logo and custom graphics on the surface of a printed praline tin box. For businesses searching for a printed waffle pail, this handle-free box with a slip-on lid offers a different style of packaging. Food-contact coating and seam protection should be reviewed together with the print design. This allows the package to support both technical product requirements and clear brand presentation.

What Matters When Ordering Wholesale Metal Food Packaging?

Wholesale metal food packaging orders should specify sheet thickness, internal and external lacquer, slip-on lid fit, seam coating and printing needs. Price differences between praline tin manufacturers are not based on capacity alone. Kontensan has produced metal packaging since 1980 and offers several finish options. Before ordering, manufacturers should test sample filling, check food-contact suitability and confirm lid performance.

Frequently Asked Questions - FAQ

What type of lid does the 3 Liter Pralin Waffle Tin Box OA use?

The technical datasheet specifies a slip-on lid. Its fit should be checked against the filling process and product use.

Which sheet thicknesses are available for this tin box?

The OA mold family offers 0.24 mm and 0.25 mm metal thickness options.

Can the praline waffle tin box have custom printing?

Yes. Offset printing is listed among the exterior finish options. Artwork and the food-contact coating must be confirmed before production.
