Product Description

3 Liter Suitcase Candy Gift Tin Box CD

The L414 – 3 Liter Suitcase Candy Gift Tin Box CD is a decorative confectionery tin that brings a suitcase-style design to metal packaging. Offered by Kontensan, it belongs to the Food Tin & Metal Packaging main category and the Candy Gift Tin Boxes collection. This gift candy tin helps confectionery brands present their products in a different way from standard boxes. Its suitcase-inspired form and decorative cord give gift packaging a clear visual character.

Suitcase-Style Candy Tin Dimensions and Technical Features

The CD mold measures 252 mm in diameter, 181 mm in length and 74 mm in height. Its nominal capacity is 3 liters. The L414 version uses 0.30 mm metal; the general mold sheet also lists 0.24, 0.25 and 0.28 mm options. L414 has a hinged slip-on lid and a seamed body. It has no hole or seam coating, while a decorative cord is included in its listed features. A metal handle and locking mechanism appear among general mold options, but buyers should not assume they are included with L414.

Gold Lacquer and Printed Confectionery Tin Options

The L414 version has gold lacquer on both its inner and outer surfaces. The technical sheet also lists silver, pigment, clear and other internal lacquer finishes, plus offset printing for the outside. Brands looking for a custom-printed candy tin or a logo-printed metal candy box can use these options to support their visual identity. However, printing and coating combinations should be confirmed before production. Any coating that touches food must be checked for the intended sweets and their contact conditions.

What Matters When Ordering Wholesale Candy Gift Tins?

This suitcase-style metal confectionery package may suit candy manufacturers, corporate gift suppliers and brands preparing special collections. Before ordering wholesale candy tins, buyers should confirm artwork, coatings, quantities and sample approval together. Candy tin prices can vary with these choices. A nominal capacity of 3 liters does not mean a fixed weight of sweets in kilograms. Actual filling weight depends on product density and how the sweets are arranged inside the tin.
