Product Description

3 L Tea and Coffee Tin

The 3 L Tea and Coffee Tin is a plain-surface metal tea tin that stands out with its round, shallow form. With a Ø120 mm diameter and 36 mm height, it suits fill volumes ranging from 0.5 to 3 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes

series under Kontensan's Food Tin & Metal Packaging main category.

Plain-Surface Round Tea and Coffee Tin

Thanks to its cordon-free plain surface, this tea tin offers an uninterrupted, wide printing area for brands. Its round, shallow form suits the tidy presentation of tea, coffee, biscuits and various treats. As a printed coffee tin, it stands out in shelf and gift uses.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. A metal coffee tin provides safe storage in medium and large volumes.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. The cordon-free plain surface allows full custom brand visuals to be applied with metal offset printing.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. A taller 3 liter version at 270 mm can also be produced.

Frequently Asked Questions - FAQ

What is the advantage of a cordon-free plain-surface tin?

A plain surface gives brands an uninterrupted, wide printing area. In this way, the design can be applied fully across the whole surface of the tin.

How much product fits in a 0.5–3 liter tin?

Capacity depends on the product's density. This range suits medium to large presentations of tea, coffee and treats.

Which packaging keeps coffee fresh?

A metal tin, which blocks light and limits air contact, is an advantage over glass and transparent packaging in protecting the aroma of coffee.

Is a taller 3 liter tin produced?

Yes. Besides the standard shallow form, a deeper 3 liter alternative at 270 mm height is also available.
