Product Description

3 Liter Welded Side-Seam Candy Gift Tin Box

The welded side-seam candy gift tin box RA is a decorative metal package designed for confectionery, dragee, Turkish delight, chocolate, and similar products that need protection and gift-ready presentation. The source header in Turkish uses 3.5 L, while the English source product name and the RA technical sheet use 3 L. The technical sheet lists a 215 mm diameter, 35 mm main technical height, and an applicable capacity range of 1–8 liters. A slip lid, welded side-seam body, and decorative bead give the package a strong and classic character. Manufactured by Kontensan, this confectionery tin is suitable for decorative packaging, printed candy tins, gift tins, round metal candy boxes, and branded metal packaging. The phrase tin can may also be used as a general search term.

Key Features of the Welded Side-Seam Candy Gift Tin Box

Ø215 mm Diameter and 1–8 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Candy Gift Tin Boxes subcategory. The Ø215 mm diameter and 35 mm main technical height create a wide and balanced package format. The 1–8 L applicable capacity range supports different filling plans within the same mold family.

Slip Lid, Welded Side-Seam Body and Decorative Bead

The technical sheet lists a slip lid, welded body, and decorative bead. No opening, handle, or hinge is listed. The welded side-seam body supports this packaging format, while the decorative bead strengthens the appearance of a round confectionery tin and supports gift-oriented presentation.

Seam Coating and Offset Printing Options

Seam coating options include lacquered inside/outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Inner and outer coating options also include several lacquer finishes, enamel, clear lacquer, decorative gold lacquer, and offset printing. These options support branded candy tins, printed confectionery tins, wholesale gift tins, and custom packaging.

Source Note

The Turkish source header uses 3.5 L, while the English source product name and the RA technical sheet use 3 L. The main technical height is 35 mm, while alternative L561 lists an 87 mm actual product height. These values and names are preserved separately.

Frequently Asked Questions - FAQ

Is this product 3.5 L or 3 L?

The Turkish source header uses 3.5 L, while the English source product name and technical sheet use 3 L. Both values are preserved because both appear in the source.

What does welded side-seam mean?

The source lists the body construction as welded and provides several seam coating options for the welded seam area.

Does the box have a decorative bead?

Yes. Both the main technical row and alternative L561 list a decorative bead.

Can the box be custom printed?

Yes. Offset printing is listed among the outer coating options, supporting custom-printed candy tin projects.
