Product Description

4 Liter Cookies and Baklava Tin Box
The 4 liter cookies and baklava tin box HD is a large-surface metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar food products. For the HD mold, the technical sheet states a diameter of 338 mm and a mold height of 36 mm, while the 4 L product example is listed with a product height of 41 mm. The same mold supports an applicable volume range of 3–21 liters. A slip lid keeps the classic metal tin appearance while providing simple opening and closing. Manufactured by Kontensan, this model is suitable for brands looking for a cookies tin, baklava tin, or large gift food package with a durable body and a strong surface for visual branding.
Key Features of the Cookies and Baklava Tin Box
Large-Volume Metal Food Packaging
This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options help the wide tin keep a stable form. Its lock-seamed body supports standardized production. According to the technical sheet, the product has no hole, handle, hinge, seam coating, or bead. This simple construction is suitable for serial production in wholesale cookie tin and wholesale baklava tin projects.
Practical Slip Lid
The 4 L model uses a slip lid. This lid gives easy access to a wide metal tin while keeping a traditional package appearance. It is suitable for bulk presentation of cookies, baklava, and syrup-based desserts. For pastry shops, dessert manufacturers, corporate gifts, and export packaging projects, the simple lid system supports practical use without adding unnecessary mechanical parts.
Offset Printing and Coating Options
The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. The large surface gives brands more space for logos, patterns, product visuals, and corporate colors on printed baklava tins and gift cookie tins.
Applications and Brand Value
The 4 liter cookies and baklava tin box can be used for large portions of cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its wide diameter creates useful space for organized product presentation. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. The reusable metal body can also remain useful after the food is consumed. Kontensan combines different lacquer and printing options with serial production capability, giving food brands a practical way to balance technical durability with strong shelf presentation in large-volume packaging.
Frequently Asked Questions - FAQ
What are the dimensions of the 4 liter cookies and baklava tin box?
The HD mold is listed with a diameter of 338 mm and a mold height of 36 mm. The 4 L product example is listed with a product height of 41 mm.
What is the applicable volume range of the HD mold?
The technical sheet states an applicable volume range of 3–21 liters for the HD mold. The 4 L model is one product within this mold family.
Can custom printing be applied to the box?
Yes. Offset printing and different lacquer options can be applied to the outer surface. The wide surface provides strong visibility for brand graphics and packaging design.
Which products can be packed in this tin box?
It is suitable for cookies, baklava, syrup-based desserts, premium food products, corporate gift sets, and other large-portion food presentations.
