Yok

Product Description

4 Liter Margarine Tin
The 4 liter margarine tin PA is a metal food package designed for margarine, bakery margarine, and similar fat-based products during filling, storage, and transport. The PA technical sheet lists a Ø175 mm diameter, 38 mm main technical height, and an applicable

capacity range of 1–7 liters. This means the same mold can support different filling volumes instead of only the nominal 4 L size. Ø122 and Ø129 mm openings, Bonbon closures, a metal handle, and a welded body allow the package to be adapted to different filling and handling needs. Manufactured by Kontensan, this margarine tin box can support bakery margarine packaging, metal oil packaging, industrial food use, and other professional applications. The phrase tin can is used only as a common English description; the source product name remains Margarine Tin.

Key Features of the 4 Liter Margarine Tin

Ø175 mm Diameter and 1–7 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Margarine Tin Cans subcategory. The Ø175 mm diameter and 38 mm main technical height show a compact mold structure that can support different filling volumes. The 1–7 L applicable capacity range provides flexibility for small and medium margarine packaging projects.

Bonbon Closure and Metal Handle Options

The technical sheet lists Ø122 mm and Ø129 mm opening options. Closure choices are Ø122 Bonbon and Ø129 Bonbon. The handle is listed as metal. No specific handle or cap color is given. This combination supports secure closing and practical carrying.

Welded Body and Coating Options

The body is welded. Seam coating options include lacquered inside and outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Inner and outer surfaces can also use silver lacquer, gold lacquer, enamel, clear lacquer, and offset printing options. The source lists no form or bead.

Source Note

The PA main technical row lists a 38 mm height, while the K099 alternative product row lists a 230 mm actual product height. These values are preserved separately as the main technical height and the alternative actual product height.

Frequently Asked Questions - FAQ

What is the technical capacity range of the 4 liter margarine tin?

The PA technical sheet lists an applicable capacity range of 1–7 liters.

Which closure options are available?

The source lists Ø122 Bonbon and Ø129 Bonbon options.

Does this tin can have a metal handle?

Yes. The technical sheet lists the handle as metal.

Why are there two height values, 38 mm and 230 mm?

The 38 mm value appears in the main technical row, while the K099 alternative product row lists a 230 mm actual product height.
