Product Description

4 Liter Paint & Thinner Tin Can Can QA

4 Liter Paint & Thinner Tin Can Can QA offers metal containers with or without a handle for manufacturers looking for four-liter paint packaging. Kontensan manufactures this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The L647 and L112 paint models are specified with 0.24 mm sheet metal and a ring-type paint lid. The same mold family also includes thinner packaging with smaller openings. This design range supports packaging selection for different filling and operating requirements.

4-Liter Paint Containers: Models With and Without Handles

The QA mold family has a reference diameter of 165 mm, a reference height of 38 mm and a capacity range of 0.8–5.8 liters. Sheet metal thicknesses of 0.24 mm and 0.25 mm are available for welded paint container production. The finished four-liter L647 model is 194 mm high, while L112 is 190 mm high. Both models use 0.24 mm sheet metal. L647 has a pail handle, while L112 has no handle. Neither body has separate shaping or ribbing. When sourcing empty paint tins, these differences should be considered in relation to filling line clearance, manual handling and carton arrangements.

Ring-Type Paint Lids and Thinner Packaging Alternatives

The L647 and L112 models feature a ring-type paint lid and have no inner or outer coating or separate seam coating. The L105 thinner model, by comparison, has a five-liter capacity, a height of 250 mm, 0.24 mm sheet metal, an enamel exterior, a 42 mm opening, a Pratik 42 mm closure and a yellow plastic handle. It has no separate inner or seam coating. The QA family also lists 32 mm and 42 mm openings, vented closures, a screw closure and metal plug options. When selecting metal paint tins with lids, the inner surface and closure system must match the chemical composition of the contents. Required approvals for dangerous goods transport must be verified separately.

Wholesale Metal Paint Containers and Custom Printing

When working with metal paint container manufacturers, brand identity matters alongside technical specifications. Kontensan has manufactured metal packaging since 1980 and exports to more than 30 countries. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Printing is not a standard feature of the documented four-liter models. Prices for wholesale empty paint cans depend on sheet metal thickness, lid, handle, surface coating, printing and order quantity. Share your target capacity and product composition to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What is the height of the four-liter paint container?

L647 with a handle is 194 mm high, while handle-free L112 is 190 mm high. Both use 0.24 mm sheet metal.

Which closure is used on the four-liter paint pail?

Both documented four-liter models feature a ring-type paint lid.
Is a different closure available for thinner packaging?
Yes. The five-liter L105 thinner container is specified with a 42 mm opening, a Pratik 42 mm closure and a yellow plastic handle.
