Product Description

4 Liter Paint & Thinner Tin Can With Lid QH

4 Liter Paint & Thinner Tin Can With Lid QH is a bottom-necked, handle-free container for paint manufacturers requiring four-liter metal packaging. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The K087 model, specified for white paint, features a finished height of 185 mm, 0.24 mm sheet metal and a ring-type paint lid. The base geometry, lid design and filling capacity are key features that buyers should consider together during purchasing.

Body Design of the Bottom-Necked Paint Container

The QH mold family has a reference diameter of 161 mm, a reference height of 190 mm and an applicable capacity range of 3.5–5 liters. Sheet metal thicknesses of 0.24 mm and 0.25 mm are available for welded paint container production. The finished four-liter K087 model is 185 mm high and uses 0.24 mm sheet metal. No additional body shaping or ribbing is specified beyond the bottom-necked design. The handle-free body can be considered for packaging designs that do not require a carrying handle. When ordering empty paint tins, check whether the base geometry fits the filling line, carton dimensions and pallet arrangements. Use the finished container height rather than the mold reference height in production planning.

Ring-Type Paint Lid and Inner Surface Options

The K087 model features a ring-type paint lid. It has no inner or outer coating, and no separate seam coating is specified. The mold family includes inner coating alternatives such as pigment, clear, gold and silver lacquers, along with enamel, lacquered and offset printed exterior finishes. When selecting metal paint tins with lids, compatibility between the paint formulation and inner surface, closure performance and storage conditions are key factors. The suitability of this model, specified for white paint, for other paint or thinner formulations must be assessed separately. Required packaging approvals for dangerous goods transport must also be verified before ordering.

Wholesale Bottom-Necked Paint Container Manufacturing

When working with metal paint container manufacturers, plan brand design and order quantity alongside container geometry. Kontensan has manufactured metal packaging since 1980. With 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities, it has manufacturing and export experience reaching more than 30 countries. Custom printed paint packaging can be considered in suitable configurations. Prices for wholesale empty paint cans depend on capacity, sheet metal thickness, coating, printing and order quantity. Share your product's technical requirements and brand design with Kontensan to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What is the height of the four-liter bottom-necked paint container?

The K087 model has a finished height of 185 mm and uses 0.24 mm sheet metal.

Does the bottom-necked paint container have a handle?

No. K087 has a handle-free body and a ring-type paint lid.

Can this paint container be custom printed?

Metal offset printing can be considered in suitable production configurations. Printing and coating specifications are agreed before ordering.
