Product Description

5 Liter Margarine Tin

The 5 liter margarine tin DA is a metal food package designed for margarine, bakery margarine, and similar fat-based products during filling, storage, and transport. The DA technical sheet lists a 158 mm diameter, 158 mm length, 38 mm main technical height, and an applicable capacity range of 0.9–6.8 liters. This means the same mold can support more than one filling volume instead of only the nominal 5 L size. The welded body and different opening and closure options make the package adaptable to different production needs. Manufactured by Kontensan, this margarine tin box can support bakery margarine packaging, metal oil tin applications, industrial food packaging, and other professional-use projects. The phrase tin can is used only as a common English expression; the source product name remains Margarine Tin.

Key Features of the 5 Liter Margarine Tin

158 × 158 mm Size and 0.9–6.8 L Capacity Range

This product is part of Kontensan's Food Tin & Metal Packaging main category and the Margarine Tin Cans subcategory. The 158 × 158 mm body size and the 38 mm main technical height show a compact mold structure that can support different filling volumes. The 0.9–6.8 L applicable capacity range provides flexibility for small and medium margarine packaging projects.

Closure and Opening Options

The technical sheet lists Ø90 mm and Ø110 mm opening options. Closure choices include Ø90 metal plug, Ø90 lacquered metal plug, Ø110 Bonbon, easy-open aluminium, and no lid/open-top. The source lists no handle or hinge. These options allow the package to be adapted to different filling and opening requirements.

Welded Body and Coating Options

The body is welded. Seam coating options include lacquered inside and outside, powder-coated inside with uncoated outside, lacquered inside with uncoated outside, powder-coated inside with lacquered outside, uncoated inside with lacquered outside, or none. Inner and outer surfaces can also use silver lacquer, gold lacquer, enamel, clear lacquer, and offset printing options. The source lists no form or bead.

Source Note

The DA main technical row lists a 38 mm height, while the K106 alternative product row lists a 230 mm height. These values are preserved separately as the main technical height and the alternative actual product height.

Frequently Asked Questions - FAQ

What is the technical capacity range of the 5 liter margarine tin?

The DA technical sheet lists an applicable capacity range of 0.9–6.8 liters.

Which closure options are available?

The source lists Ø90 metal plug, Ø90 lacquered metal plug, Ø110 Bonbon, easy-open aluminium, and open-top options.

Why are there two height values, 38 mm and 230 mm?

The 38 mm value appears in the main technical row, while the K106 alternative product row lists a 230 mm actual product height.

Does this tin can have a handle?

No. The technical sheet lists no handle or hinge.
