Product Description

5 Liter Paint & Thinner Tin Can DA

5 Liter Paint & Thinner Tin Can DA belongs to a metal container family for five-liter packaging requirements in the paint and thinner industry. Kontensan offers this product in Paint & Thinner Tin Can under Industrial and Chemical Tin Cans, Pails, and Drums. The K126 model, specified for thinner, features a finished height of 235 mm, 0.24 mm sheet metal, an enamel exterior and a white plastic handle. The five-liter capacity can be considered for chemical product ranges intended for professional applications.

Dimensions and Body Design of the 5-Liter Paint Container

The DA mold family lists two horizontal reference dimensions of 158 mm, a reference height of 38 mm and a capacity range of 1–7 liters. Sheet metal options of 0.24 mm, 0.25 mm and 0.28 mm are specified for the welded body. The K126 model has a finished height of 235 mm, a nominal capacity of five liters and a sheet thickness of 0.24 mm. It has no separate body shaping or ribbing. Businesses purchasing empty metal paint tins should consider finished external dimensions together with filling equipment, carton arrangements and warehouse layouts. Nominal capacity does not indicate the weight of the contents in kilograms.

42 mm Closure and Enamel Finish for Thinner Packaging

The K126 thinner tin has a 42 mm opening, a Pratik 42 mm closure and a white plastic handle. Unlike its enamel exterior, the inner surface and seam have no separate coating. The DA family also lists vented and textured Pratik 42 mm closures, a Pratik 43 mm screw closure and a 42 mm metal plug. Inner lacquer and exterior finish preferences should be based on the chemical composition of the contents. Closure performance is another consideration when selecting metal paint tins. A model specified for thinner should not be assumed to suit every type of paint, and required approvals for dangerous goods transport must be verified separately.

Wholesale Empty Paint Cans and Custom Manufacturing

When discussing orders with paint tin manufacturers, specify target capacity, closure, sheet metal thickness, surface finish and order quantity. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing lines support custom printed paint packaging in suitable configurations. The standard exterior of K126 is enamel; custom printing is a separate production choice. When purchasing wholesale empty paint tins, share your brand design, chemical product characteristics and shipping expectations to request a comparable quotation.

Frequently Asked Questions - FAQ

What are the dimensions of the 5-liter thinner container?

K126 has a finished height of 235 mm and a sheet thickness of 0.24 mm. The mold family lists horizontal reference dimensions of 158 mm.

Which closure does the thinner container use?

K126 is specified with a 42 mm opening, a Pratik 42 mm closure and a white plastic handle.

Can empty paint tins be custom printed?

Metal offset printing can be considered in suitable production configurations. Design and printing surface are agreed before ordering.
