5 Liter Paint & Thinner Tin Can HA

HA

Technical Specifications

Mold Code	HA
Diameter	116
Length	150
Height	100
Volume	1.7 - 5.5 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm · 0,26 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø32 mm · Ø42 mm

Kapak

Pratik 32 mm · Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Ø42 Metal Tapa · Pratik 32 mm, Ventilli · Sibop

Kulp

Plastic · Metal

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Dikiş/Kenet

Dikişli

Alternative Sizes

Product Description

5 Liter Paint & Thinner Tin Can HA

5 Liter Paint & Thinner Tin Can HA belongs to a metal container family for industrial manufacturers developing paint and thinner packaging in different capacities. Kontensan offers this product in Paint & Thinner Tin Can under Industrial and Chemical Tin Cans, Pails, and Drums. The HA family's capacity range of 1.7–5.5 liters includes the nominal five-liter option. Different opening diameters and plastic or metal handle options allow buyers to consider packaging designs that match their operating conditions. The documented finished L371 example in the technical datasheet is a two-liter thinner container.

Paint Container Geometry and Capacity in the HA Family

The mold datasheet lists 116 mm and 150 mm in its diameter and length fields, with a reference height of 100 mm. Sheet metal options of 0.24 mm, 0.25 mm and 0.26 mm are available for the welded body, with no separate shaping or ribbing specified. These figures describe the production options of the mold family. The exact finished height and external dimensions of the five-liter version must be confirmed according to the order configuration. Considering different capacities in the same family can help with packaging plans for different product ranges. When sourcing empty paint tins, buyers should consider shelf arrangements, handling and filling equipment compatibility alongside filling volume.

32 and 42 mm Closure Options

The HA family is specified with opening diameters of 32 mm and 42 mm. The technical datasheet lists Pratik closures, vented and textured options, a Pratik 43 mm screw closure, a 42 mm metal plug and a valve option. The two-liter L371 thinner tin has a finished height of 135 mm, 0.24 mm sheet metal, a 42 mm opening, a Pratik 42 mm closure and a white plastic handle. It has no inner or outer coating, separate seam coating or body shaping. These are not confirmed features of the five-liter version. When selecting metal paint tins with closures, chemical compatibility and required transport approvals must be verified for the intended contents.

Wholesale Metal Paint Tins and Printing Options

When working with metal paint packaging manufacturers, businesses can plan brand consistency and technical specifications across different container sizes. Kontensan has manufactured metal packaging since 1980. Its total indoor production area of 25,000 square meters in Konya and Istanbul and offset printing facilities support custom printed paint packaging requests in suitable configurations. The HA family lists enamel, lacquered and offset printed exterior options. To request prices for wholesale empty paint cans, share your target capacity, handle and closure preferences, chemical product characteristics, print design and order quantity for a technical assessment and manufacturing quotation.

Frequently Asked Questions - FAQ

Which metal thicknesses are available for the 5-liter paint container?

The HA family lists 0.24 mm, 0.25 mm and 0.26 mm options. The finished five-liter version's thickness is confirmed before ordering.

Which handle options does the HA family offer?

The technical datasheet lists plastic and metal handles. The documented two-liter L371 model has a white plastic handle.

What is the capacity range of the HA mold family?

It ranges from 1.7 to 5.5 liters. The datasheet includes a finished two-liter example; exact dimensions of the five-liter version require separate confirmation.
