Product Description

6 Liter Paint & Thinner Tin Can Can PA

6 Liter Paint & Thinner Tin Can Can PA is a product for paint and thinner manufacturers looking for six-liter industrial metal packaging. Kontensan offers it in the Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The L773 model, specified for thinner, features 0.25 mm sheet metal, a finished height of 250 mm, an enamel exterior and a red plastic handle. Although the Turkish product name refers to a pail, this model is specified with a Pratik 42 mm closure and a 42 mm opening rather than a wide-opening pail lid.

Body Features of the 6-Liter Welded Paint Container

For this product, the PA mold family has a reference diameter of 175 mm, a reference height of 38 mm and a capacity range of 0.9–7.2 liters. Sheet metal options of 0.24 mm, 0.25 mm and 0.28 mm are available for welded body production. The six-liter L773 model uses 0.25 mm sheet metal and has a finished height of 250 mm. It has no separate body shaping or ribbing. When sourcing empty metal paint tins, use finished container dimensions rather than mold reference dimensions. Filling line clearance, product density, handling weight after filling and carton arrangements directly influence packaging selection.

Pratik 42 mm Closure and Enamel Exterior

The L773 thinner tin features a 42 mm opening, a Pratik 42 mm closure and a red plastic handle. It has an enamel exterior, with no separate inner coating or seam coating. The PA mold family also lists vented and textured Pratik 42 mm closures, a Pratik 43 mm screw closure and a 42 mm metal plug. Inner coating options include pigment, clear, gold and silver lacquers. When selecting metal paint tins with closures, the inner surface and closure system must be compatible with the chemical composition of the contents. Compatibility with paint formulations and required approvals for dangerous goods transport must be verified separately.

Wholesale Empty Paint Cans and Printed Packaging

For metal paint packaging manufacturers, packaging matters for brand visibility as well as its technical function. Kontensan has manufactured metal packaging since 1980 and operates 25,000 square meters of indoor production space in Konya and Istanbul. Its metal offset printing facilities support custom printed paint packaging in suitable production configurations. The standard exterior of L773 is enamel; printed production is a separate option. Prices for wholesale empty paint tins depend on sheet metal thickness, closure system, coating, printing and order quantity. Share your product composition, target capacity and brand design with Kontensan to request a technical assessment and manufacturing quotation.

Frequently Asked Questions - FAQ

What is the sheet metal thickness of the 6-liter thinner container?

The L773 model uses 0.25 mm sheet metal and has a finished height of 250 mm.

Which closure is used on the 6-liter thinner container?

L773 has a 42 mm opening, a Pratik 42 mm closure and a red plastic handle.

Can the 6-liter paint container be custom printed?

Metal offset printing can be considered in suitable configurations. Printing and surface finish specifications are agreed before ordering.
