6 Liter Paint & Thinner Tin Can Can WA

WA

Technical Specifications

Mold Code	WA
Diameter	213
Height	140
Volume	5 - 11.4 lt

Applicable Features

Kalınlık

0,24 mm · 0,28 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø42 mm

Kapak

Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Ø42 Metal Tapa

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Product Description

6 Liter Paint & Thinner Tin Can Can WA

6 Liter Paint & Thinner Tin Can Can WA belongs to the WA mold family for medium-volume metal packaging requirements in the paint and thinner industry. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The nominal six-liter capacity can be considered by chemical manufacturers planning different sales volumes. This family is specified with a 42 mm opening and various closure systems. The finished example documented in the technical datasheet is the seven-liter L567 thinner container.

6-Liter Paint Container: Sheet Thickness and Body Design

The WA mold family has a reference diameter of 213 mm, a reference height of 140 mm and a capacity range of 5–11.4 liters. Sheet metal thicknesses of 0.24 mm and 0.28 mm are specified for the welded body. No separate body shaping or ribbing is listed for this family. The L567 model has a finished height of 220 mm, a capacity of seven liters and 0.28 mm sheet metal. These figures are not confirmed finished dimensions of the six-liter version. When sourcing empty metal paint tins, consider filling machine clearance, external container dimensions and shipping arrangements together. Product density is also important when determining filling weight.

42 mm Closures and Surface Finish Options

The WA family lists a Pratik 42 mm closure, vented and textured closures, a Pratik 43 mm screw closure and a 42 mm metal plug for the specified opening. A plastic handle is an option at family level. L567 is specified with a Pratik 42 mm closure, a white plug color and a handle-free body. It has no inner or outer coating or separate seam coating. Various inner lacquers, enamel and offset printed exterior finishes can be considered according to order requirements. For paint and thinner packaging, chemical compatibility, closure performance and required transport approvals must be verified for the intended contents.

Wholesale Empty Paint Cans and Custom Printing

When working with metal paint container manufacturers, consider compliance with the technical specification as well as price. Kontensan has manufactured metal packaging since 1980. Its total indoor production area of 25,000 square meters in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Printing is not a standard feature of L567. For wholesale empty paint tins, target capacity, closure type, sheet metal thickness, surface finish and order quantity form the basis of a quotation. Share your chemical product information and brand design with Kontensan to request a technical assessment and manufacturing quotation for your product range.

Frequently Asked Questions - FAQ

Which sheet metal thicknesses are available for the 6-liter paint container?

The WA family lists 0.24 mm and 0.28 mm options. Finished product thickness is confirmed before ordering.

Which closure options are available for thinner tins?

Pratik, vented and screw closures and metal plug alternatives are specified for the 42 mm opening.

What are the dimensions of the 7-liter thinner container?

L567 has a finished height of 220 mm and 0.28 mm sheet metal. It has a Pratik 42 mm closure and no handle.
