8 Liter Pralin Waffle Pail SA

SA

Technical Specifications

Mold Code	SA
Diameter	220
Height	140
Volume	5 - 12 lt

Applicable Features

Kalınlık

0,28 mm · 0,30 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Yok

Kapak

Yok (Ağzı Açık) · Kova Kapağı (Formasız)

Kulp / Menteşe

Kova Kulpu

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon

Product Description

8 Liter Pralin Waffle Pail SA

The 8 Liter Pralin Waffle Pail SA is a metal food packaging option for praline, waffle sauce and fruit puree. Kontensan offers this model in its Praline Waffle Puree Tin range under Food Tin & Metal Packaging. Its eight-liter capacity is suitable for manufacturers packing products in larger quantities. The handle and lid options can be selected to match production, storage and transportation needs.

What Is a Metal Praline Pail Used For?

A metal praline pail may be used for praline mixtures and thick dessert ingredients. Businesses looking for waffle sauce tins or fruit puree metal containers can also consider this product family. However, capacity alone does not confirm suitability. Food acidity, fat content, filling temperature and storage conditions affect the choice of internal lacquer. The selected coating must be checked for direct food-contact suitability before production.

Technical Structure of the 8 Liter Praline Waffle Pail

The SA mold family datasheet lists a 220 mm diameter and a volume range from 5 to 12 liters. Its general 140 mm height reference should not be treated as the final height of the eight-liter version. The listed K025 eight-liter example is 217 mm high and uses 0.28 mm metal. This version has a gold-lacquered interior, an unshaped pail lid, a handle, a seamed body, powder lacquer inside and lacquer outside on the seam, and one reinforcing bead. The SA family also offers 0.28 mm and 0.30 mm metal, various internal lacquers and exterior finishes including offset printing.

Printed Waffle Pail for Branded Packaging

A printed waffle pail or printed praline pail can display product details and brand identity on its metal surface. The SA family includes offset printing as an available exterior option for custom designs. However, the K025 example does not specify an exterior finish. A printed configuration therefore needs separate confirmation. When comparing praline pail manufacturers, buyers should consider food-contact coating suitability as carefully as visual appearance.

Key Factors for Wholesale Metal Food Pail Orders

Wholesale metal food pail orders require clear choices about metal thickness, lid, handle, seam coating and printing method. Waffle tin pail prices depend on these details and order quantity. Kontensan has produced metal packaging since 1980 and offers solutions for several industries. Buyers comparing praline waffle pail manufacturers should verify sample filling, lid fit and food safety requirements before approving production.

Frequently Asked Questions - FAQ

How tall is the 8 Liter Pralin Waffle Pail SA?

The K025 eight-liter example in the technical datasheet has a height of 217 mm. General SA mold dimensions cover other sizes.

What metal thickness does the eight-liter praline pail use?

The K025 example uses 0.28 mm metal. The SA mold family offers 0.28 mm and 0.30 mm options.

Can the praline waffle pail have custom printing?

The SA family offers offset printing as an exterior option. The final print configuration and food-contact interior coating must be approved before manufacturing.
