Mineral Oil Tin Pail XA

XA

Technical Specifications

Mold Code	XA
Diameter	277
Height	150 - 500
Volume	9 - 30 lt

Applicable Features

Kalınlık

0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø42 mm · Ø56 mm

Kapak

Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli

Kulp

Kova Kulpu · Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Dikiş/Kenet

Dikişli

Product Description

Mineral Oil Tin Pail XA

Mineral Oil Tin Pail XA is a metal drum family designed for packaging mineral oils and industrial lubricants in medium-volume containers. Kontensan offers the product in its Mineral Oil Tin Cans range under Industrial and Chemical Tin Cans, Pails, and Drums. The XA mold family covers capacities from 9 to 30 liters. The documented 19-liter L809 model has a finished height of 305 mm, 0.32 mm sheet metal, a plastic handle and a Pratik 56 mm closure. These are the specifications of that finished model, not fixed features of every drum within the XA family.

Diameter, Capacity and Sheet Thickness of Metal Oil Drums

The XA family has a mold diameter of 277 mm, a height range of 150–500 mm and a capacity range of 9–30 liters. Available sheet metal thicknesses are 0.30 mm, 0.32 mm and 0.38 mm. The finished L809 drum has a capacity of 19 liters, a height of 305 mm and 0.32 mm sheet metal. Its welded body has one reinforcing rib. When sourcing empty lubricant containers, distinguish the family's available ranges from the dimensions of an individual finished drum. Filling line height, stacking and pallet arrangements, and shipping weight should be calculated using actual container dimensions and the density of the product being filled.

Pratik 56 mm Closure, Plastic Handle and Ribbed Body

The L809 model has a 56 mm opening, a Pratik 56 mm closure, a plastic handle and a red closure or plug color. No separate lacquer coating is specified for its interior, exterior or seam. The XA family also provides 42 mm and 56 mm openings, Pratik 42 mm closures with vented and textured variants, a Pratik 43 mm screw closure, and press-fit or vented Pratik 56 mm options. Pail handles, plastic handles, single-rib and double-rib bodies are alternative configurations. They are not all standard features of L809. Compatibility between the lubricant and the container's inner surface and closure, together with any required leak or transport approvals, must be verified separately.

Wholesale Mineral Oil Pails and Custom Printed Packaging

For mineral oil packaging manufacturers, product protection and brand presentation are both important purchasing factors. The XA family lists inner coatings such as silver, pigment, gold and clear lacquer, as well as enamel, lacquered and offset printed exterior finishes. Kontensan has produced metal packaging since 1980 and operates a total of 25,000 square meters of indoor production space in Konya and Istanbul. Its metal offset printing facilities support custom printed lubricant packaging in suitable configurations. The company exports to more than 30 countries. Wholesale metal lubricant container prices may vary with capacity, sheet thickness, closure and handle selection, coating, printing and order quantity. Share your lubricant specifications and target capacity when requesting a production quotation.

Frequently Asked Questions - FAQ

What capacities are available for mineral oil pails?

The XA family covers 9–30 liters. Exact dimensions depend on the selected finished model.

What is the height of the 19-liter mineral oil drum?

L809 has a finished height of 305 mm and uses 0.32 mm sheet metal. The XA family diameter is 277 mm.

Which closure and handle does this metal oil drum use?

L809 features a Pratik 56 mm closure, a plastic handle and a single-rib body. Other configurations require separate selection.
